A Journal of Essays, Reviews, Interviews, and Research

## Introduction

Reading Aldous Huxley's *Brave New World* is a journey into a world that is both familiar and alien. The novel's exploration of the future of humanity, its critique of the industrial revolution, and its vision of a world where technology and science have taken control, are as relevant today as they were when the book was first published. This annual is dedicated to exploring the many facets of Huxley's work, from his early novels to his later essays and interviews. We hope that this collection of essays, reviews, and research will provide a comprehensive and engaging look at the life and work of this great writer.

Gabriel, Bernard Wilson, 2021-06-17 Acknowledging the significance of Edward Said's Orientalism for contemporary discourse the contributors to this volume deconstruct rearrange and challenge elements of his thesis looking at the new conditions and opportunities offered by globalization What can a renewed or reconceptualized Orientalism teach us about the force and limits of our racial imaginary specifically in relation to various national contexts In what ways for example considering our greater cross cultural interaction have clichés and stereotypes undergone a metamorphosis in contemporary societies and cultures Theoretically and empirically this book offers an expansive range of contexts comprising the insights analytical positions and perspectives of a transnational team of scholars of comparative literature and literary and cultural studies based in Australia Hong Kong Japan Malaysia USA Singapore Taiwan and Turkey Working with through and beyond Orientalism they examine a variety of cultural texts including the novel short story poetry film graphic memoir social thought and life writing Making connections across centuries and continents they articulate cultural representation and discourse through multiple approaches including critical content analysis historical contextualization postcolonial theory gender theory performativity intertextuality and intersectionality Given its unique approach this book will be essential reading for scholars of literary theory film studies and Asian studies as well as for those with a general interest in postcolonial literature and film

*The Embodiment of American Culture* Heinz Tschachler, Maureen Devine, Michael Draxlbauer, 2003 American culture has literally become fixated on the body at the same time that the body has emerged as a key term within critical and cultural theory Contributions thus address the body as a site of the cultural construction of various identities which are themselves enacted negotiated or subverted through bodily practices Contributions come from literary and cultural studies film and media studies history and sociology and women studies and are representative of many theoretical positions hermeneutic historical structuralist feminist postmodernist They deal with representations and discursifications of the body in a broad array of texts in literature the visual arts theater the performing arts film and mass media science and technology as well as in various cultural practices

*The Perennial Satirist* Peter Edgerly Firchow, Hermann Josef Real, 2005 This collection of essays primarily honours Bernfried Nügel the teacher and scholar but it also pays homage to Bernfried Nügel the indefatigable worker in the cause of Aldous Huxley studies It is due to this latter manifestation that many of the contributors to this volume know each other personally having met at one or more of the international conferences that Professor Nügel organized and either hosted or co hosted At Münster his home university he has also been instrumental in establishing and heading a center for admirers of Huxley's work along with a fine library of Huxley materials including manuscripts and numerous first editions Series Human Potentialities Studien zu Aldous Huxley zeitgenössischer Kultur Studies in Aldous Huxley Contemporary Culture Vol 7

*Reluctant Modernists* Peter Edgerly Firchow, 2002 The essays collected here deal with modernist writers who on the whole felt reluctant about their modernist status because they believed that it was just as

important to look backward as it was to look forward Indeed for most of them looking backward was more important because it was only through the past that one could understand one's proper place in the present and in the future That is why in Huxley's *Brave New World* it is the rejection of the past in the future and by implication in the present that makes its satire so penetrating Modernism in other words means for these writers not a radical break with the past but a continuing search for what still connects them and us vitally with it Peter Firchow Professor of English at the University of Minnesota is the author of several books on modern and modernist literary subjects including books on Huxley Conrad and Auden The publication of some of his hitherto uncollected essays in this volume is intended to honor **Growing Old in a Better**

**World** Robert Troschitz, 2024-09-23 As utopias question social ills and express human wants and unfulfilled dreams they offer insights into the problems desires and ideals of a certain time This book uses this lens to examine cultural representations of ageing and old age in utopian writings from the Renaissance till today The individual chapters offer detailed analyses and interpretations of numerous utopias from Thomas More's *Utopia* 1516 to contemporary science fiction Through close readings the book explores age related fears and ideals and investigates how perceptions of ageing and the life course as well as attitudes towards older people have developed over the centuries Covering a large time span and a broad range of different utopias the book identifies long term developments and also puts certain dreams such as that of ever lasting youth into a wider perspective It thus enriches both our understanding of the cultural history of ageing and the history of utopian thought The book will appeal to scholars and students from the fields of cultural gerontology and utopian studies as well as literary studies and cultural history more generally **The Writer and the Cross** Darren J.N. Middleton, 2022-06-27

Spiritually engaged readers commonly look toward fiction to better understand the depth of a faithful life and Christians are no exception Many followers of Jesus value beautifully written deftly characterized and pulse quickening literary art that seems more satisfying than dry tedious doctrinal textbooks This book surveys 12 pieces of historical fiction that feature notable Christian thinkers They include an illustrated children's book about St Irenaeus of Lyons a novel about Martin Luther's Reformation a screenplay focusing on Dietrich Bonhoeffer and even a story about Pope Francis narrated in popular manga style Rather than arcane literary analyses this book provides thoughtful and sometimes painful interviews with the authors of the covered works Most interviewees are little known or emerging writers Some have published their work with a church or denominational press others with a major publishing empire or popular print on demand platforms Storytellers reflect on their literary choices and the contexts of their writing sharing what modern Christians can learn from historical religious fiction *Literature, Science, and Public Policy* Jay Clayton, 2023-08-17 *Literature Science and Public Policy* shows how literature can influence public policy concerning scientific controversies in genetics and other areas Literature brings unique insights to issues involving cloning GMOs gene editing and more by dramatizing their full human complexity Literature's value for public policy is demonstrated by striking examples that range from the literary response to evolution in the

Victorian era through the modern synthesis of evolution and genetics in the mid twentieth century to present day genomics. Outlining practical steps for humanists who want to help shape public policy, this book offers vivid readings of novels by H G Wells, H Rider Haggard, Aldous Huxley, Robert Heinlein, Octavia Butler, Samuel R Delany, David Mitchell, Margaret Atwood, Ian McEwan, Kazuo Ishiguro, Gary Shteyngart and others that illustrate the important insights that literary studies can bring to debates about science and society. This title is also available as Open Access on Cambridge Core.

**Between the Pigeonholes** Alison Falby, 2020-12-15. Aldous Huxley described Gerald Heard as that rare being, a learned man who made his mental home on the vacant spaces between the pigeonholes. Heard's off beat interests made him a cultural and intellectual pioneer on both sides of the Atlantic in the middle decades of the twentieth century. Despite accolades from such figures as E M Forster, who characterized him as one of the most penetrating minds in England, and Christopher Isherwood, who described him upon his death as one of the few great magic mythmakers and revealers of life's wonder, Heard is largely unknown today. *Between the Pigeonholes* is the first published full length study of Gerald Heard. Alison Falby examines Heard's ideas and contexts in interwar Britain and postwar America, demonstrating his significance in several important twentieth century movements. These movements include popular science and psychology, psychical research, Eastern spirituality, pacifism, cooperativism, and Californian counter culture. All of Heard's involvements expressed his desire to convey religious ideas in the modern languages of biological, social, and physical science. Falby also traces Heard's shifting political leanings from left liberal in the early 1930s to libertarian in the early 1960s. She finds that his modernist theological approach, conventionally associated with liberal religion and politics, provided spiritual fodder for those on both the Left and the Right. Isherwood and W H Auden on the one hand, and Clare Boothe Luce and *Spiritual Mobilization* on the other. Using Heard as a prism through which to examine popular ideas, Falby shows that the twentieth century contained much political and religious heterogeneity. This heterogeneity illustrates the diverse and overlapping roots of both liberal religion and conservative politics in the twenty first century.

*Interconnecting Music and the Literary Word* Fausto Ciompi, Roberta Ferrari, Laura Giovannelli, 2018-07-27. Dealing with the interconnections between music and the written word, this volume brings into focus an updated range of analytical and interpretative approaches which transcend the domain of formalist paradigms and the purist assumption of music's non referentiality. Grouped into three thematic sections, these fifteen essays by Italian, British, and American scholars shed light on a phenomenological network embracing different historical, socio cultural, and genre contexts, and a variety of theoretical concepts such as intermediality, the soundscape, notion, and musicalisation. At one end of the spectrum, music emerges as a driving cultural force, an agent cooperating with signifying and communication processes, and an element functionally woven into the discursive fabric of the literary work. The authors also provide case studies of the fruitful musical-literary dialogue by taking into account the seminal role of composers, singer songwriters, and performers. From another standpoint, the music in literature and literature in music dynamics are explored through the syntax of hybridisations.
