Updated self assessment section matching the latest exam formats confirm your understanding and improve exam technique fast. *Studies on Indian Medical History* Gerrit Jan Meulenbeld, D. Wujastyk, 2001. This volume of studies presents the papers given at the second workshop of the European Ayurdic society, a group which was formed in Groningen in 1983. The volume is thus a sequel to Proceedings of the international workshop on priorities in the study of Indian medicine. The

workshop was held over a period of three days in September 1985 in the congenial surroundings of the Wellcome Institute for the History of Medicine in London and it provided a splendid opportunity for scholars in the field of Indian medical history to meet in one place and to share the latest research in their respective areas

Pharmacology Case Studies for Nurse Prescribers

Donna Sholefield, Alan Sebt, Alison Harris, 2015-04-24 Nurse prescribers are now practising within every discipline of nursing and midwifery both in the community and the hospital setting This much needed book is aimed particularly at students on a non medical prescribing NMP course as well as those nurses who are studying for their community practitioner non medical prescribing qualification as part of the specialist practice programme The book is also a useful resource for nursing students and registered nurses who administer and or prescribe medicines The authors offer a basic introduction to pharmacological concepts embedded in specific conditions through case studies and self assessment questions By utilising a case study approach they enable the reader to link pharmacological concepts with clinical practice Many of the conditions presented will be seen across all healthcare settings In addition the comprehensive glossary and list of abbreviations will enable students to understand some of the more technical terms used in the British National Formulary BNF and other prescribing sources Reading this book and carrying out the numerous self assessment activities will give the reader an appreciation of the value of having a sound pharmacological knowledge base in order to deliver safe practice effective prescribing and improved patient care Contents include Introduction How the body affects drugs How drugs affect the body Types of adverse drug reactions and interactions Understanding and using the British National Formulary Adherence Children Stable angina Hypertension Heart failure Chronic obstructive pulmonary disease Neurological problems Gastrointestinal disorders Incontinence in adults Diabetes Mental health problems Eye problems Complex health needs and polypharmacy Palliative care The challenges of non medical prescribing
