An Atlas of Histology Shu-Xin Zhang, 2013-03-20 The beginning student of histology is frequently confronted by a paradox diagrams in many books that illustrate human microanatomy in a simplified cartoon like manner are easy to understand but are difficult to relate to actual tissue specimens or photographs In turn photographs often fail to show some important features of a given tissue because no individual specimen can show all of the tissue's salient features equally well This atlas filled with photo realistic drawings was prepared to help bridge the gap between the simplicity of diagrams and the more complex reality of microstructure All of the figures in this atlas were drawn from histological preparations used by students in my histology classes at the level of light microscopy Each drawing is not simply a depiction of an individual histological section but is also a synthesis of the key structures and features seen in many preparations of similar tissues or organs The illustrations are representative of the typical features of each tissue and organ The atlas serves as a compendium of the basic morphological characteristics of human tissue which students should be able to recognize

**Color Atlas of Basic Histology** Irwin Berman, 2003-02-03 This unique atlas includes over 475 full color photomicrographs while providing students with a readily accessible source of morphologic information for use in the identification of tissues and organs Each photomicrograph is accompanied by explanatory captions that guide students to the key morphologic features that identify the function of the structures The self assessment section at the end of the book serves as a review tool for those structures that students traditionally have difficulty in identifying
