The Publishers' Trade List Annual, 1977 Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office, 1976 *Catalog of Copyright Entries, Fourth Series* Library of Congress. Copyright Office, 1978 **English Journal**, 1978 **Coordination Languages and Models** Paolo Ciancarini, Alexander L. Wolf, 2003-07-31 We welcome you to Coordination 99 the third in a series of conferences dedicated to an important perspective on the development of complex software systems That perspective is shared by a growing community of researchers interested in models languages and implementation techniques for coordination The last decade has seen the emergence of a class of models and languages variously termed coordination languages coordination languages architectural description languages and agent oriented programming languages These formalisms provide a clean separation between individual software components and their interaction within the overall software organization This separation makes complex applications more tractable supports global analysis and enhances the reuse of software components The proceedings of the previous two conferences on this topic were published by Springer as Lecture Notes in Computer Science 1061 and 1282 This issue of LNCS containing the papers presented at Coordination 99 continues the tradition of carefully selected and high quality papers representing the state of the art in coordination technology In response to the call for papers we received 67 submissions from which 26 papers were accepted These proceedings also contain abstracts for posters presented at the conference This year's program features invited talks by Rocco De Nicola and Danny B Lange Reading through the papers we expect that you may be surprised by the variety of disciplines within computer science that have embraced the notion of coordination In fact we expect this trend to continue and hope that you will contribute to the ongoing exploration of its strengths weaknesses and applications

Integrated Model of Distributed Systems Wiktor B. Daszczuk, 2019-03-16 In modern distributed systems such as the Internet of Things or cloud computing verifying their correctness is an essential aspect This requires modeling approaches that reflect the natural characteristics of such systems the locality of their components autonomy of their decisions and their asynchronous communication However most of the available verifiers are unrealistic because one or more of these features are not reflected Accordingly in this book we present an original formalism the Integrated Distributed Systems Model IMDS which defines a system as two sets states and messages and a relation of the actions between these sets The server view and the traveling agent's view of the system provide communication duality while general temporal formulas for the IMDS allow automatic verification The features that the model checks include partial deadlock and partial termination communication deadlock and resource deadlock Automatic verification can support the rapid development of distributed systems Further on the basis of the IMDS the Dedan tool for automatic verification of distributed systems has been developed Intelligent Agents V: Agents Theories, Architectures, and Languages Jörg Müller, Munindar P. Singh, Anand S. Rao, 2007-04-29 The leading edge of computer science research is notoriously fickle New trends come and go with alarming and unfailing

regularity In such a rapidly changing field the fact that research interest in a subject lasts more than a year is worthy of note The fact that after five years interest not only remains but actually continues to grow is highly unusual As 1998 marked the fifth birthday of the International Workshop on Agent Theories Architectures and Languages ATAL it seemed appropriate for the organizers of the original workshop to comment on this remarkable growth and reflect on how the field has developed and matured The first ATAL workshop was co-located with the Eleventh European Conference on Artificial Intelligence ECAI 94 which was held in Amsterdam The fact that we chose an AI conference to co-locate with is telling at that time we expected most researchers with an interest in agents to come from the AI community The workshop which was planned over the summer of 1993 attracted 32 submissions and was attended by 55 people ATAL was the largest workshop at ECAI 94 and the clear enthusiasm on behalf of the community made the decision to hold another ATAL workshop simple The ATAL 94 proceedings were formally published in January 1995 under the title Intelligent Agents and included an extensive review article a glossary a list of key agent systems and unusually for the proceedings of an academic workshop a full subject index The high scientific and production values embodied by the ATAL 94 proceedings appear to have been recognized by the community and resulted in ATAL proceedings being the most successful sequence of books published in Springer Verlag's Lecture Notes in Artificial Intelligence series **Automata, Languages and Programming** Pierpaolo Degano, 1997-06-18

This book constitutes the refereed proceedings of the 24th International Colloquium on Automata Languages and Programming ICALP 97 held in Bologna Italy in July 1997 ICALP 97 celebrated the 25th anniversary of the European Association for Theoretical Computer Science EATCS which has sponsored the ICALP meetings since 1972 The volume presents 73 revised full papers selected from a total of 197 submissions Also included are six invited contributions ICALP is one of the few flagship conferences in the area The book addresses all current topics in theoretical computer science

Smalltalk Dan Shafer, Dean A. Ritz, 2012-12-06 Object Oriented Programming OOP is recognized as one of the most powerful programming techniques to come along in many years Its power lies in the ability it gives the designer to manage the complex rapidly changing applications that have become the watchword of modern software Smalltalk is the most extensively used OOP environment Now Practical Smalltalk helps you to focus on those aspects of the language that you need to know to be a successful programmer You ll learn all about the important classes to master the essential theories to grasp and then put these ideas to work in constructing everything from a simple counter object all the way through a data graphing application and the core of a functional outline The book culminates with the creation of a factory process simulation that takes advantage of Smalltalk's ability to create multi window multiprocessing applications Designed for programmers and managers who must understand the operation and uses of the Smalltalk environment this book assumes only an elementary working knowledge of OOP and the language The book uses Smalltalk V 286 Digitalk's widely used implementation of Smalltalk but most of the concepts and techniques it teaches can be transferred easily to other versions of the language

Information Modelling and Knowledge Bases XX Y. Kiyoki, T. Tokuda, H. Jaakkola, 2009-02-11 In the last decades information modelling and knowledge bases have become essentially important subjects not only in academic communities related to information systems and computer science but also in the business area where information technology is applied The 18th European Japanese Conference on Information Modelling and Knowledge Bases EJC 2008 continues the series of

events that originally started as a cooperation initiative between Japan and Finland. Later the geographical scope of these conferences expanded to cover the whole of Europe and other countries as well. The EJC conferences constitute a worldwide research forum for the exchange of scientific results and experiences achieved in computer science and other related disciplines using innovative methods and progressive approaches. In this way a platform has been established drawing together researches as well as practitioners dealing with information modelling and knowledge bases. The main topics of EJC conferences target the variety of themes in the domain of information modelling, conceptual analysis, multimedia knowledge bases, design and specification of information systems, multimedia information modelling, multimedia systems, ontology, software engineering, knowledge and process management. The aim of this publication is also applying new progressive theories. To this end much attention is paid also to theoretical disciplines including cognitive science, artificial intelligence, logic, linguistics and analytical philosophy.

Art and Meaning Alan J. Hauser, David J. A. Clines, David M. Gunn, 1982-06-01

Biblical authors were artists of language who created their meaning through their verbal artistry, their rhetoric. These twelve essays see meaning as ultimately inseparable from art and seek to understand the biblical literature with sensitivity to the writer's craft.

Contents: David Clines, *The Arguments of Job's Friends*; George Coats, *A Moses Legend in Numbers 12*; Charles Davis, *The Literary Structure of Luke 1-2*; Cheryl Exum, *A Literary Approach to Isaiah 28*; David Gunn, *Plot, Character and Theology in Exodus 1-14*; Alan Hauser, *Intimacy and Alienation in Genesis 2-3*; Charles Isbell, *Story Lines and Key Words in Exodus 1-2*; Martin Kessler, *Methodology for Rhetorical Criticism*; John Kselman, *A Rhetorical Study of Psalm 22*; Kenneth Kuntz, *Rhetorical Criticism and Isaiah 51-1-16*; Ann Vater, *Form and Rhetorical Criticism in Exodus 7-11*; Edwin Webster, *Pattern in the Fourth Gospel*.

New Vistas in Grammar Linda R. Waugh, Stephen Rudy, 1991-12-27

The papers in this volume reflect the renewed interest in the semantics of grammatical categories and the issues of invariance and variation in grammar. In particular, this collection presents the current understanding of invariance of grammar with respect to the synchronic and diachronic analyses of specific languages and as realized in work on typology and universals. The book is divided into five sections: The Question of Invariance; Invariance and Grammatical Categories; Grammar and Discourse; Grammar and Pragmatics; Typology and Universals.

Formal Modeling: Actors; Open Systems, Biological Systems Gul Agha, Olivier Danvy, José Meseguer, 2011-10-30

This Festschrift volume, published in honor of Carolyn Talcott on the occasion of her 70th birthday, contains a collection of papers presented at a symposium held in Menlo Park, California, USA, in November 2011. Carolyn Talcott is a leading researcher and mentor of international renown among computer scientists. She has made key contributions to a number of areas of computer science, including semantics and verification of programming languages, foundations of actor-based systems, middleware, meta-architectures, and systems. Maude and rewriting logic and computational biology. The 21 papers presented are organized in topical sections named: Essays on Carolyn Talcott; actors and programming languages; cyberphysical systems; middleware and meta-architectures; formal methods and reasoning tools; and

computational biology **Models, Languages, and Tools for Concurrent and Distributed Programming** Michele Boreale, Flavio Corradini, Michele Loreti, Rosario Pugliese, 2019-07-03 This volume was published in honor of Rocco De Nicola's 65th birthday. The Festschrift volume contains 27 papers written by close collaborators and friends of Rocco De Nicola and was presented to Rocco on the 1st of July 2019 during a two-day symposium held in Lucca, Italy. The papers present many research ideas that have been influenced by Rocco's work. They testify his intellectual curiosity, versatility, and tireless research activity and provide an overview of further developments to come. The volume consists of six sections. The first one contains a laudation illustrating the distinguished career and the main scientific contributions by Rocco and a witness of working experiences with Rocco. The remaining five sections comprise scientific papers related to specific research interests of Rocco and are ordered according to his scientific evolution: Observational Semantics, Logics and Types, Coordination, Models and Languages, Distributed Systems, Modelling, Security.
