Brüggemeier, 2004 Article 288 2 EC on liability of the European Community and its organs refers to the common principles of tort law in the Member States There are at least two good reasons for looking into these general principles in nearly all developed Western legal orders tort law is determined through judge made law which now requires a comparative orientation by means of principles and systemized casuistry and the various attempts to Europeanize private law from mere restatements to a comprehensive European Civil Code are all grounded in these common principles of contract law tort law property law and so on This book's somewhat unconventional contribution takes its cue not so much from the politically defined EC Europeanization but rather from the transnationality of law By comparing tort law in the EC member state Germany and the non EC member the US two of the most developed western industrial nations this publication endeavors to develop principles which serve as a basis for generalization These principles claim validity for the civil law and common law legal orders of Western civilizations which includes the EC with its respective Member States This title is aimed at a learned European audience interested in legal harmonization but also addresses comparatists in the civil law and common law legal world and mixed jurisdictions outside of Europe Its main focus is to contribute to the further development of tort law The idea of a tort law system based on general principles and specific rules grows out of the continental natural law tradition of civil law but increasingly principle oriented works are also found in common law This book develops a common level of international work on structures and concepts of modern tort law **Basic Principles of Tort Law** Marshall S. Shapo, 1999
