Basic Self Knowledge:

Basic Self-knowledge Harry Benjamin, 1961 **Basic Self-knowledge** Harry Benjamin, 196? **Self-Knowledge** Brie Gertler, 2010-11-25 In this outstanding introduction Brie Gertler assesses the leading theoretical approaches to self knowledge explaining the work of many of the key figures in the field from Descartes and Kant through to Bertrand Russell and Gareth Evans as well as recent work by Tyler Burge David Chalmers William Lycan and Sydney Shoemaker Essential reading for students of philosophy of mind epistemology and metaphysics **Expression and Self-Knowledge** Dorit Bar-On, Crispin Wright, 2023-09-12 Provides a timely and original contribution to the debate surrounding privileged self knowledge Contemporary epistemologists and philosophers of mind continue to find puzzling the nature and source of privileged self knowledge the ordinary and effortless first person knowledge we have of our own sensations moods emotions beliefs desires and hopes In *Expression and Self Knowledge* Dorit Bar On and Crispin Wright articulate their joint dissatisfaction with extant accounts of self knowledge and engage in a sustained and substantial critical debate over the merits of an expressivist approach to the topic The authors incorporate cutting edge research while defending their own alternatives to existing approaches to so called first person privilege Bar On defends her neo expressivist account addressing the objection that neo expressivism fails to provide an adequate epistemology of ordinary self knowledge and addresses new objections levelled by Wright Wright then presents an alternative pluralist approach and Bar On argues in response that pluralism faces difficulties neo expressivism avoids Providing invaluable insights on a hotly debated topic in epistemology and philosophy of mind *Expression and Self Knowledge* Presents an in depth debate between two leading philosophers over the expressivist approach Offers novel developments and penetrating criticisms of the authors respective views Features two different perspectives on the influential remarks on expression and self knowledge found in Wittgenstein's later writings Includes four jointly written chapters that offer a critical overview of prominent existing accounts which provide a useful advanced introduction to the subject *Expression and Self Knowledge* is essential reading for epistemologists philosophers of mind and language psychologists with an interest in self knowledge and researchers and graduate students working in expression expressivism and self knowledge *Externalism, Self-Knowledge, and Skepticism* Sanford Goldberg, 2015-08-21 This collection of new essays explores the implications of semantic externalism for self knowledge and skepticism **Basic Self-Knowledge** Harry Benjamin, 1988-01 In both *Theosophic Mysticism* and these commentaries and in the system of esoteric development expounded by Gurdjieff are the keys to the true meaning and purpose of existence To understand them is to gain freedom from self imprisonment from which we all suffer This book explores the essentials of this self knowledge and the basic theosophic pattern underlying Nicoll Gurdjief and Krishnamurti's teachings *Know Yourself* Ole Jakob Filtvedt, Jens Schröter, 2023-12-31 The book explores ancient interpretations and usages of the famous Delphic maxim know yourself The primary emphasis is on Jewish Christian and Greco Roman sources from the first four centuries CE The

individual contributions examine both direct quotations of the maxim as well as more distant echoes Most of the sources included in the book have never previously been studied in any detail with a view to their use and interpretation of the Delphic maxim Thus the book contributes significantly to the origin and different interpretations of the maxim in antiquity as well as to its reception history in ancient philosophical and theological discourses The chapters of the book are linked to each other by numerous cross references which makes it possible to compare the different views of the maxim with each other It also helps readers to notice relationships and trajectories within the material The explorations of the relevant sources are also set in the context of ongoing debates about the shape and nature of ancient conceptions of self and self knowledge The book thus demonstrates the wide variety of philosophical and theological approaches in that the injunction to know oneself could be viewed and how these interpretations provide windows into ancient discourses about self and self knowledge

Controversies and Subjectivity Pierluigi Barrotta, Marcelo Dascal, 2005-01-01 This collective volume focuses on two closely connected issues whose common denominator is the embattled notion of the subject The first concerns the controversies on the nature of the subject and related notions such as the concepts of I and self From both theoretical and historical viewpoints several of the contributors show how different and incompatible perspectives on the subject can help us understand today's world its habits style power relations and attitudes For this purpose use is made of insights in a broad range of disciplines such as sociology psychoanalysis pragmatics intellectual history and anthropology This interdisciplinary approach helps to clarify the multifaceted character of the subject and the role it plays nowadays as well as over the centuries The second issue concerns the subject in inter personal as well as in intra personal controversies The enquiry here focuses on the ways in which different aspects of the subject and subjective differences affect the conduct content and rationality of controversies with others as well as within oneself on a variety of topics Among such aspects the contributors analyse the subject's emotions cognitive states argumentative practices and individual and collective identity The interaction between the two issues the controversies on the subject and the subject of controversies sheds new light on the debate on modernity and its alleged crisis

relation to the problem of mental content on the intelligibility of eliminativist views of the mental on the prospects for a naturalistic reduction of mental content and on the currently influential view that meaning is a normative notion Part two includes three widely discussed papers on the phenomenon of self knowledge and its compatibility with externalist conceptions of mental content Part three concerns the classical but ill understood phenomenon of knowledge that is based upon knowledge of meaning or conceptual competence Finally part four turns its attention from general issues about mental content to an account of a specific class of mental contents It contains two widely discussed papers on the nature of colour concepts and colour properties

Philosophy in Mind Murray Michael, John

O'Leary-Hawthorne, 2012-12-06 Increasingly the mind is being treated as a fit subject for scientific inquiry As cognitive science and empirical psychology strive to uncover the mind's secrets it is fitting to inquire as to what distinctive role is left for philosophy in the study of mind This collection which includes contributions by some of the leading scholars in the field offers a rich variety of perspectives on this issue Topics addressed include the place of a priori inquiry in philosophy of mind moral psychology consciousness social dimensions of intentionality the relation of logic to philosophical psychology objectivity and the mind and privileged access

Internal Affairs K.L. Butler, 2013-11-11 This book is not written for posterity It is meant to constitute part of my contribution to a continuing debate at the intersection of the philosophy of mind the philosophy of language epistemology and the philosophy of cognitive science The debate is over how mental states are individuated Many philosophers call them externalists or anti individualists believe that the individuation of mental states requires appeal to an individual's social and or physical environment I am not among them I am an internalist or individualist This book attempts to show that the leading proponents of externalism make a lot of mistakes in defending their view This is either because the view is false so any defense of it is bound to make some mistake or another or it is because the people defending externalism have not been very careful or both I have included some introductory material so that those not already familiar with the issues involved might nevertheless gain entry into the debate The intended audience however consists in those professional philosophers and students of philosophy who are already familiar with and interested in the question of how mental states are individuated I do not spend much time trying to motivate an interest in this issue Like all philosophy it is interesting and worthwhile if one is blessed or cursed with the appropriate kind of intellectual curiosity Those who do not meet this requirement proceed at their own risk

Rails to Infinity Crispin Wright, 2001 This volume published on the fiftieth anniversary of Wittgenstein's death brings together thirteen of Crispin Wright's most influential essays on Wittgenstein's later philosophies of language and mind many hard to obtain including the first publication of his Whitehead Lectures given at Harvard in 1996 Organized into four groups the essays focus on issues about following a rule and the objectivity of meaning on Saul Kripke's contribution to the interpretation of Wittgenstein on privacy and self knowledge and on aspects of Wittgenstein's philosophy of mathematics Wright uses the cutting edge of Wittgenstein's thought to expose and undermine the common assumptions in platonistic views of mathematical and logical objectivity and Cartesian ideas about self knowledge The great question remains How to react to the demise of these assumptions In response the essays develop a concerted evolving approach to the possibilities and limitations of constructive philosophies of mathematics and mind Their collection constitutes a major statement by one of Britain's most important philosophers and will provide an indispensable tool both for students of Wittgenstein and for scholars working more generally in the metaphysics of mind and language

Tibetan Buddhist Philosophy of Mind and Nature Douglas S. Duckworth, 2019 Tibetan Buddhist Philosophy of Mind and

Nature is a philosophical overview of Tibetan Buddhist thought Charting the different ways Buddhist traditions in Tibet configure the relationship between Madhyamaka and Mind Only Duckworth shows how these configurations inform the shape of distinct contemplative practices

Kant and the Problem of Self-Knowledge Luca Forgione, 2018-10-17 This book addresses the problem of self knowledge in Kant's philosophy As Kant writes in his major works of the critical period it is due to the simple and empty representation I think that the subject's capacity for self consciousness enables the subject to represent its own mental dimension This book articulates Kant's theory of self knowledge on the basis of the following three philosophical problems 1 a semantic problem regarding the type of reference of the representation I think 2 an epistemic problem regarding the type of knowledge relative to the thinking subject produced by the representation I think and 3 a strictly metaphysical problem regarding the features assigned to the thinking subject's nature The author connects the relevant scholarly literature on Kant with contemporary debates on the huge philosophical field of self knowledge He develops a formal reading according to which the unity of self consciousness does not presuppose the identity of a real subject but a formal identity based on the representation I think

What Determines Content? The Internalism/Externalism Dispute Tomas Marvan, 2009-01-14 A distinguished team of fourteen European philosophers addresses the current debates on internalism versus externalism in the philosophy of language and mind The main objective of the volume is to demonstrate the philosophical significance and fruitfulness of the internalism externalism debate on a wide range of issues and to do so in a manner which is sophisticated yet accessible to non specialists The issues authors deal with include linguistic deference interpreting classical externalist thought experiments by Putnam and Burge the nature of Wittgenstein's externalism apriority intersubjective externalism and object dependence of thought and temporal externalism Some of the contributors try to strike a balance between internalist and externalist position
