General

Techniques of Cell Culture Maureen A. Harrison, Ian F. Rae, 1997-10-13 Cell culture techniques are invaluable to the modern researcher but difficult to carry out successfully. As part of the series of Handbooks in Practical Animal Cell Biology this volume offers a concise practical guide to the basic essentials of the technique. Researchers new to cell culture will find a clear explanation of the essential equipment of a tissue culture facility including tissue culture media and sera. It describes methods for growing suspension and adhesion cultures including how to store cells and prepare primary cultures from cells. For those already culturing cells the handbook will act as a handy reference to the basic techniques. The essence of the book is to deal with the generalities of cell culture and to give a grasp of the basic concepts before involvement in more specialized work in the field. Ideal for anyone moving into tissue cell culture techniques or looking for a concise reference book.

Basic

Cell Culture John M. Davis, 1994 In the last 20 years cell culture has developed enormously from being used only in specialized areas of research to being the cornerstone of probably the world's fastest growing industry biotechnology. The primary aim of this book is to guide the newcomer progressively through all those areas which nowadays are fundamental to the performance of cell culture. The book will also prove useful to the experienced worker. Topics covered include setting up and equipping a cell culture laboratory, sterilization of fluids and equipment, culture media, culture technique, the maintenance of cell lines, primary culture and the isolation of new cell lines, specific cell types and their requirements, single cell cloning, quality control of cell lines and the prevention, detection and cure of contamination and good laboratory practice in the cell culture laboratory.

Culture of Animal Cells R. Ian Freshney, 2015-12-23 Since the publication of the sixth edition of this benchmark text numerous advances in the field have been made particularly in stem cells, 3D culture, scale up, STR profiling and culture of specialized cells.
