Making Sergii Babichev, Volodymyr Lytvynenko, 2021-07-22 This book is devoted to current problems of artificial and computational intelligence including decision making systems Collecting analysis and processing information are the current directions of modern computer science Development of new modern information and computer technologies for data analysis and processing in various fields of data mining and machine learning creates the conditions for increasing effectiveness of the information processing by both the decrease of time and the increase of accuracy of the data processing The book contains of 54 science papers which include the results of research concerning the current directions in the fields of data mining machine learning and decision making The papers are divided in terms of their topic into three sections The first section Analysis and Modeling of Complex Systems and Processes contains of 26 papers and the second section Theoretical and Applied Aspects of Decision Making Systems contains of 13 papers There are 15 papers in the third section Computational Intelligence and Inductive Modeling The book is focused to scientists and developers in the fields of data mining machine learning and decision making systems **Software Engineering - ESEC/FSE '99** Oskar Nierstrasz, Michel Lemoine, 1999-08-30 For the second time the European Software Engineering Conference is being held jointly with the ACM SIGSOFT Symposium on the Foundations of Software Engineering FSE Although the two conferences have different origins and traditions there is a significant overlap in intent and subject matter Holding the conferences jointly when they are held in Europe helps to make these thematic links more explicit and encourages researchers and practitioners to attend and submit papers to both events The ESEC proceedings have traditionally been published by Springer Verlag as they are again this year but by special arrangement the proceedings will be distributed to members of ACM SIGSOFT as is usually the case for FSE ESEC FSE is being held as a single event rather than as a pair of colocated events Submitted papers were therefore evaluated by a single program committee ESEC FSE represents a broad range of software engineering topics in mainly two continents and consequently the program committee members were selected to represent a spectrum of both traditional and emerging software engineering topics A total of 141 papers were submitted from around the globe Of these nearly half were classified as research papers quarters as experience papers and the rest as both research and experience papers Twenty nine papers from five continents were selected for presentation and inclusion in the proceedings Due to the large number of industrial

experience reports submitted we have also introduced this year two sessions on short case study presentations

Basic Computational Techniques for Data Analysis D Narayana, Sharad Ranjan, Nupur Tyagi, 2023-06-20 This book is designed to equip students to navigate through MS Excel and basic data computation methods which are essential tools in research or professional settings and in classrooms It illustrates the concepts used in research and data analysis and economic and financial decision making in business and in daily life The book will help students acquire knowledge and develop skills in statistical techniques and financial analysis using MS Excel With illustrations and examples it will help the readers to Visualize present and analyze data through MS Excel spreadsheets and tables and create personal or business spreadsheets Learn how to work with spreadsheets use formulae and perform calculations and analysis Create tables including Pivot Tables Become familiar with basic statistical and financial measures Design creative spread sheets and communicate effectively in business using spreadsheets and data analysis This revised and updated second edition will be an essential resource for students of economics commerce management and other social science subjects and will be useful to those studying econometrics financial technology basic computational techniques data analysis and applied economics Content The book intends to illustrate the concepts used in economic and financial decision making in business and in daily life it helps demonstrate a deeper understanding from both theoretical and practical perspectives An effort has been made to make the book student friendly by using simple language and giving a number of illustrations in each chapter solved in such a simple manner that they can be easily understood by the students Practical questions have been included at the end of each chapter so that the students can independently solve them and test their understanding of the concepts and computations introduced in the chapter Outcome At the end students will be able to describe what a spreadsheet is and what Excel s capabilities are and can work with elements that make up the structure of a worksheet They will be able to work with spreadsheets and enter data in Excel use formulae and calculations and create tables charts and pivot tables They will be familiar with basic statistical and financial measures of general use They will be able to do basic computations in statistics and finance in Excel Students will acquire the capacity to create personal and or business spreadsheets following current professional and or industry standards Their potential for critical thinking to design and create spreadsheets and communicate in a business setting using spreadsheet vocabulary will be enhanced The educational background required for the student to understand the text is some basic English and Mathematics of school leaving level Some fl air for numbers will be an asset and for them it will be a breeze others will have to make an effort but ample illustrations and practice questions make life simple whether it is basic statistics or slightly intricate finance

Clinical Neuropsychology Kenneth M. Heilman James E. Rooks Jr. Distinguished Professor of Neurology and Clinical and Health Psychology, Chair of the Department of Neurology Residency Program University of Florida College of Medicine Edward Valenstein William L. and Janice M. Neely Professors of Neurology, Gainesville, 2003-02-05 Clinical Neuropsychology comprehensively reviews the major neurobehavioral disorders

associated with brain dysfunction Since the third edition appeared in 1993 there have been many advances in the understanding and treatment of neurobehavioral disorders This edition like prior editions describes the classical signs and symptoms associated with the major behavioral disorders such as aphasia agraphia alexia amnesia apraxia neglect executive disorders and dementia It also discusses advances in assessing diagnosing and treating these disorders and it addresses the brain mechanisms underlying these deficits A multi authored text has the advantage of having authorities write about the disorders in which they have expertise The fourth edition adds new authors and five entirely new chapters on phonologic aspects of language disorders syntactic aspects of language disorders lexical semantic aspects of language disorders anosognosia hallucinations and related conditions This is the most comprehensive edition of this text to date It will be of value to clinicians investigators and students from a variety of disciplines including neurology psychology cognitive neuroscience psychiatry and speech pathology *Semi-Infinite Programming* Rembert Reemtsen, Jan-J.

Rückmann, 1998-04-30 Semi infinite programming briefly SIP is an exciting part of mathematical programming SIP problems include finitely many variables and in contrast to finite optimization problems infinitely many inequality constraints Problems of this type naturally arise in approximation theory optimal control and at numerous engineering applications where the model contains at least one inequality constraint for each value of a parameter and the parameter representing time space frequency etc varies in a given domain The treatment of such problems requires particular theoretical and numerical techniques The theory in SIP as well as the number of numerical SIP methods and applications have expanded very fast during the last years Therefore the main goal of this monograph is to provide a collection of tutorial and survey type articles which represent a substantial part of the contemporary body of knowledge in SIP We are glad that leading researchers have contributed to this volume and that their articles are covering a wide range of important topics in this subject It is our hope that both experienced students and scientists will be well advised to consult this volume We got the idea for this volume when we were organizing the semi infinite programming workshop which was held in Cottbus Germany in September 1996

Business Statistics Naval Bajpai, 2009 Business Statistics offers readers a foundation in core statistical concepts using a perfect blend of theory and practical application This book presents business statistics as value added tools in the process of converting data into useful information The step by step approach used to discuss three main statistical software applications MS Excel Minitab and SPSS which are critical tools for decision making in the business world makes this book extremely user friendly India centric case studies and examples demonstrate the many uses of statistics in business and economics The underlying focus on the interpretation of results rather than computation makes this book highly relevant for students and practising managers Practice quizzes and true false questions for students and lecture slides and solutions manual for instructors are available at http://wps.pearsoned.com/bajpai_businessstatistics_e *Computational Science - ICCS 2007* Yong Shi, 2007-05-18 Annotation The four volume set LNCS 4487 4490 constitutes the refereed proceedings of the 7th

A *Comparison of Lifting-Line and CFD Methods with Flight Test Data from a Research Puma Helicopter*, 1996 Four lifting line methods were compared with flight test data from a research Puma helicopter and the accuracy assessed over a wide range of flight speeds Hybrid CFD methods were also examined for two high speed conditions A parallel analytical effort was performed with the lifting line methods to assess the effects of modeling assumptions and this provided insight into the adequacy of these methods for load predictions
