

## Electronic Construction Techniques

Experience is a hard teacher because she gives the test first, the lesson after.

—Vernon Law<sup>1</sup>

### 16.1 INTRODUCTION

Advanced mixed-signal electronic hardware can be designed on a computer and taken straight to multilayer surface-mount circuit cards without prototyping. Then—unless you're a Certified Wizard—it will fail to work and have to be cut apart with a Dremel grinder, laboriously debugged, partly redesigned, and laid out again.

This chapter is mainly about electronic prototyping and the reduction of a working prototype to a working PC board, with specific application to high frequency, high dynamic range, mixed-signal circuitry. We'll talk about laying circuits out intelligently, calculating the circuit board strays, assembling breadboards, and tuning *LC* filters. By the end, you should be equipped to build what you've designed, without suffering from avoidable layout and assembly bugs such as ground loops. You'll need to be comfortable with test equipment, know how to solder (preferably blindfolded), and have basic prototyping skills such as stuffing boards, wiring connectors, and drilling boxes.

### 16.2 CIRCUIT STRAYS

Simulations often don't match up with experimental reality, due to modeling errors and circuit strays. Strays arise from Maxwell's equations and the known properties of well-behaved conductors and dielectrics. We may not know the exact boundary conditions well enough to produce a perfect model of the self- and mutual inductance and capacitance of everything in the circuit, but we can usually take a good first cut at it; since we hope that their effect is not dominant, that's often enough. It doesn't replace prototyping, but it helps a lot in reducing the prototype to a circuit board, where the strays are usually much worse.<sup>2</sup>

<sup>1</sup>This Week, August 14, 1990.

<sup>2</sup>It is surprising to many people that a small circuit card can have worse strays than some big ugly prototype with wires in mid-air, but it usually has.
