Large-Scale Studies in Mathematics Education James A. Middleton, Jinfa Cai, Stephen Hwang, 2015-05-05 In recent years funding agencies like the Institute of Educational Sciences and the National Science Foundation have increasingly emphasized large scale studies with experimental and quasi experimental designs looking for objective truths Educational researchers have recently begun to use large scale studies to understand what really works from developing interventions to validation studies of the intervention and then to efficacy studies and the final scale up for large implementation of an intervention Moreover modeling student learning developmentally taking into account cohort factors issues of socioeconomics local political context and the presence or absence of interventions requires the use of large data sets wherein these variables can be sampled adequately and inferences made Inroads in quantitative methods have been made in the psychometric and sociometric literatures but these methods are not yet common knowledge in the mathematics education community In fact currently there is no volume devoted to discussion of issues related to large scale studies and to report findings from them This volume is unique as it directly discusses methodological issue in large scale studies and reports empirical data from large scale studies

Strength in Numbers Sherman K. Stein, 2008-05-02 An Easygoing Highly Entertaining Refresher on all the Math You'll Ever Need What do two goats and a car have to do with making good decisions

Was the golden ratio used to build the Great Pyramid of Khufu Can it be that some numbers are unmistakably hot while others are inherently cool With his infectiously enthusiastic and engaging style award winning teacher and author Sherman K Stein offers a new appreciation for mathematics from the beauty of its logic as inevitable and memorable as a Mozart symphony to its amazing power and pervasiveness in our lives Requiring no math knowledge beyond basic arithmetic and high school geometry *Strength in Numbers* is an enlightening introduction to all the math you ll ever need **Effective Math Interventions** Robin S. Coddington, Robert J. Volpe, Brian C. Poncy, 2017-02-09 Building foundational whole number knowledge can help put K 5 students on the path to academic success and career readiness Filling a gap for school practitioners this book presents step by step guidelines for designing and implementing classwide small group and individual interventions for mathematics difficulties Effective procedures for screening assessment intervention selection and progress monitoring are described and illustrated with detailed case vignettes User friendly features include 20 reproducible handouts and forms the print book has a large size format with lay flat binding for easy photocopying Purchasers get access to a Web page where they can download and print the reproducible materials This book is in The Guilford Practical Intervention in the Schools Series edited by T Chris Riley Tillman **Management Accounting Research (RLE Accounting)** Charles F. Klemstine, Michael W. Maher, 2014-02-05 This bibliography presents a review of trends in management accounting research and a classified annotated listing of over 600 works in the area It is intended to help the accounting researcher or student who wishes to review the development of the literature in management accounting over many years The book traces this development from 1926 to 1982 through the primary academic journals This review has focussed on accounting literature and includes only those works from outside the accounting literature that were seminal in defining and introducing a research area and were frequently referenced in the accounting literature *Educational Research and Innovation Critical Maths for Innovative Societies The Role of Metacognitive Pedagogies* Mevarech Zemira, Kramarski Bracha, 2014-10-28 This report looks at a number of published studies on mathematics education that try to understand which education and skills are appropriate for innovative societies **A Five-Year Study of the First Edition of the Core-Plus Mathematics Curriculum** Harold Schoen, Steven W. Ziebarth, Christian R. Hirsch, Allison BrckaLorenz, 2010-07-01 The study reported in this volume adds to the growing body of evaluation studies that focus on the use of NSF funded Standards based high school mathematics curricula Most previous evaluations have studied the impact of field test versions of a curriculum Since these innovative curricula were so new at the time of many of these studies students and teachers were relative novices in their use These earlier studies were mainly one year or less in duration Students in the comparison groups were typically from schools in which some classes used a Standards based curriculum and other classes used a conventional curriculum rather than using the Standards based curriculum with all students as curriculum developers intended The volume reports one of the first studies of the efficacy of Standards based mathematics curricula with all of the following characteristics The study

focused on fairly stable implementations of a first edition Standards based high school mathematics curriculum that was used by all students in each of three schools It involved students who experienced up to seven years of Standards based mathematics curricula and instruction in middle school and high school It monitored students mathematical achievement beliefs and attitudes for four years of high school and one year after graduation Prior to the study many of the teachers had one or more years of experience teaching the Standards based curriculum and or professional development focusing on how to implement the curriculum well In the study variations in levels of implementation of the curriculum are described and related to student outcomes and teacher behavior variables Item data and all unpublished testing instruments from this study are available at www.wmich.edu/cmp for use as a baseline of instruments and data for future curriculum evaluators or Core Plus Mathematics users who may wish to compare results of new groups of students to those in the present study on common tests or surveys Taken together this volume the supplement at the CPMP Web site and the first edition Core Plus Mathematics curriculum materials samples of which are also available at the Web site serve as a fairly complete description of the nature and impact of an exemplar of first edition NSF funded Standards based high school mathematics curricula as it existed and was implemented with all students in three schools around the turn of the 21st century The Social Psychology of the Primary School Colin Rogers,Peter Kutnick,1992-04-02 Colin Rogers and Peter Kutnick reassess the role of social psychology in educational practice for the primary classroom They offer an analysis of the ways in which the process and structure of classroom life affect the interpersonal and academic outcomes of schooling Social schooling is seen to have a crucial role to play in achieving effective t Education Policy Implementation Allan Odden,1991-09-03 This supplemental text for educational policy administration and program evaluation courses provides a framework for examining the following crucial questions To what extent have state and federal initiated policies actually been implemented during the past 25 years and To what degree does implementation lead to effectiveness At a time when critical understanding of the issues is essential for good decision making this volume provides a valuable tool for teachers students and makers of educational policy
