CAT 1 and 2

1. A group of twelve children participate in a psychological study designed to assess the relationship, if any between age, x years and average total sleep time (ATST), y minutes. To obtain a measure of ATST, recordings were taken on each child on five consecutive nights and then averaged. The results obtained are shown in the below.

Child	Age (x years)	ATST (y minutes)
A	4.4	586
B	6.7	565
C	10.5	515
D	9.6	532
E	12.4	478
F	5.5	560
G	11.1	493
H	8.6	533
I	14.0	575
	10.1	490
K	7.2	530
L	7.9	515

- a) Draw a scatter diagram and determine the regression between age and ATST.

Basic Social Statistics:

Basic Social Statistics Wilbert Marcellus Leonard, 1976 **Basic Statistics for Social Research** Robert A. Hanneman, Augustine J. Kposowa, Mark D. Riddle, 2012-11-15 A core statistics text that emphasizes logical inquiry not math Basic Statistics for Social Research teaches core general statistical concepts and methods that all social science majors must master to understand and do social research Its use of mathematics and theory are deliberately limited as the authors focus on the use of concepts and tools of statistics in the analysis of social science data rather than on the mathematical and computational aspects Research questions and applications are taken from a wide variety of subfields in sociology and each chapter is organized around one or more general ideas that are explained at its beginning and then applied in increasing detail in the body of the text Each chapter contains instructive features to aid students in understanding and mastering the various statistical approaches presented in the book including Learning objectives Check quizzes after many sections and an answer key at the end of the chapter Summary Key terms End of chapter exercises SPSS exercises in select chapters Ancillary materials for both the student and the instructor are available and include a test bank for instructors and downloadable video tutorials for students **Social Statistics** Thomas J. Linneman, 2011-05-20 With just the right level of detail and a graphically innovative approach this book carefully guides students through the statistical techniques they will encounter in the real world The basics plus multiple regression interaction effects logistic regression non linear effects all covered in a non intimidating way for your students The book uses three datasets throughout General Social Survey American National Election Studies World Values Survey and includes SPSS demonstrations at the end of each chapter Most of your students will likely take only one stats course and use only one stats book in their college careers This one innovatively equips them for their worlds ahead regardless of the career paths they follow Page i *Basic Social Statistics* David Knoke, George W. Bohrnstedt, 1991 **Social Statistics for a Diverse Society** Chava Frankfort-Nachmias, Anna Leon-Guerrero, 2006 Social Statistics for a Diverse Society provides students with a revealing introduction to social science statistics This Fourth Edition maintains the same informal conversational writing style along with the many pedagogical features that made previous editions so successful It is an excellent textbook for students taking their first course in social statistics and can also be used in a number of sociological research methods courses BOOK JACKET Introducing Social Statistics Richard Startup, Elwyn T. Whittaker, 2021-10-17 Originally published in 1982 this book describes those basic ideas and techniques of statistics which should be known to every social scientist The explanations are given in careful detail at a level of mathematical sophistication which will be readily attainable by students meeting statistical methods for the first time All the methods described are applied to and sometimes are motivated by genuine problems of interest arising in sociology social policy politics or human geography The authors often provide a meaningful discussion of the substantive problem itself in addition to an analysis of the statistical techniques being used on it In this way subject matter and statistical techniques

are integrated in an original and effective manner The authors combine considerable experience of shared teaching of social statistics with familiarity with its use in practical fields and in research Their book therefore focuses on the most directly applicable methods and is carefully sequenced to promote rapid student understanding The topic of probability which so often confuses students is here dealt with simply yet thoroughly The chapter on the sources of social statistics whilst being unusual in a text of this kind is particularly welcome and comprehensively meets the needs of students on a wide range of courses Introducing Social Statistics will make the vitally important field of statistics accessible to all students of the social sciences

Basic Social Statistics Wilbert M. Leonard, II, 1976-02-01 Essentials of Social Statistics for a Diverse Society Anna Leon-Guerrero, Chava Frankfort-Nachmias, 2011-09-30

Essentials of Social Statistics for a Diverse Society provides students with a briefer less expensive version of the successful Social Statistics for a Diverse Society now in its Sixth Edition As in the parent text this concise statistics text puts a strong emphasis on the theme of diversity which is illustrated through the use of real data in examples from contemporary social issues The book's informational and inviting writing style coupled with the use of real world examples makes the book a more accessible and engaging resource for students

Social Statistics in Use Philip Morris Hauser, 1975-12-01 Shows why social statistics are important and how they are put to use in the interest of the public Written by a sociologist who serves as Director of the Population Research Center at the University of Chicago the book illustrates the many applications social statistics have for governmental agencies at the federal state and local levels for the business community for labor unions for educators and researchers and for the general public The author provides a description of the major bodies of social statistical information including population births deaths and health marriage divorce and the family education the labor force crime consumption and the consumer recreation governments and public opinion polls
