Basic Stuff Series 1 Psychosocial Aspects Of Physical Education:

Foundations of Physical Education and Sport Deborah A. Wuest, Charles Augustus Bucher, 1991 **Resources in Education** ,1992-04 **Psychological Factors in Physical Education and Sport - Volume IV** Manuel Gómez-López, Carla Maria Chicau Costa Borrego, Marianna Alesi, David Manzano Sánchez, 2025-02-19 The regular practice of physical activity has a positive influence on the physical and psychological health of participants In a context such as sports or physical education classes knowledge and manipulation of psychological variables such as attention self confidence stress control anxiety motivation cohesion self control or emotional self regulation moods and interpersonal skills can influence sports commitment and sports or academic performance Furthermore it has also been confirmed that a highly competitive context under a motivational climate involving the ego can generate feelings of fear of failure and the appearance of feelings of shame causing in athletes and students some degree of insecurity anxiety or stress and avoidance behaviors which will negatively affect the well being interpersonal behavior and performance Therefore physical and psychological well being depends on the social environments in which physical activity and sport are practiced and therefore on the significant agents in the environment This Research Topic would aim to collect the most recent research on factors influencing physical and psychological well being and adherence to physical activity in the context of sports and physical education classes

Administration of Physical Education & Athletic Programs Charles Augustus Bucher, 1983 *Management of Physical Education & Athletic Programs* Charles Augustus Bucher, 1987 **Research in Education** ,1974 **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), 1965 *Current Research in Sports Sciences* R. Maughan, V.A. Rogozkin, 2013-03-14 There are two main reasons for pursuing research in the Sports Sciences Firstly by studying responses to exercise we learn about the normal function of the tissues and or gans whose function allows exercise to be performed The genetic endowment of elite athletes is a major factor in their success and they represent one end of the continuum of human performance capability the study of elite athletes also demonstrates the limits of human adaptation because nowhere else is the body subjected to such levels of intensive exercise on a regular basis The second reason for studying Sports Science is the intrinsic interest and value of the subject itself Elite performers set levels to which others can aspire but even among spectators sport is an important part of life and society of top sport and elite performers there is also another reason Apart from the study for medical and scientific interest in sport There is no longer any doubt that lack of physical activity is a major risk factor for many of the diseases that affect people in all countries such diseases include coronary heart disease obesity hypertension and diabetes An increased level of recreational physical activity is now an accepted part of the prescription for treatment and prevention of many illnesses including those with psychological as well as physical causes An understanding of the normal response to exercise as well as of the role of exercise in disease prevention is therefore vital *Monthly Catalog of United States Government Publications* ,1990 **Food and Nutrition Information**
