Nontimber Forest Products in the United States Eric T. Jones, Rebecca Jean McLain, James F. Weigand, 2002 A quiet
revolution is taking place in America's forests. Once seen primarily as stands of timber, our woodlands are now prized as a
rich source of a wide range of commodities from wild mushrooms and maple sugar to hundreds of medicinal plants whose
uses have only begun to be fully realized. Now as timber harvesting becomes more mechanized and requires less labor, the
image of the lumberjack is being replaced by that of the forager. This book provides the first comprehensive examination of
nontimber forest products (NTFPs) in the United States, illustrating their diverse importance, describing the people who
harvest them, and outlining the steps that are being taken to ensure access to them. As the first extensive national overview of
NTFP policy and management specific to the United States, it brings together research from numerous disciplines and
analytical perspectives such as economics, mycology, history, ecology, law, entomology, forestry, geography, and anthropology in
order to provide a cohesive picture of the current and potential role of NTFPs. The contributors review the state of scientific
knowledge of NTFPs by offering a survey of commercial and noncommercial products, an overview of uses and users, and
discussions of sustainable management issues associated with ecology, cultural traditions, forest policy, and commerce. They
examine some of the major social, economic, and biological benefits of NTFPs while also addressing the potential negative
consequences of NTFP harvesting on forest ecosystems and on NTFP species populations. Within this wealth of information
are rich accounts of NTFP use drawn from all parts of the American landscape, from the Pacific Northwest to the Caribbean.
From honey production to a review of nontimber forest economies still active in the United States, such as the Ojibway
harvest of plants recounted here, the book takes in the whole breadth of recent NTFP issues, including ecological concerns
associated with the expansion of NTFP markets and NTFP tenure issues on federally managed lands. No other volume offers
such a comprehensive overview of NTFPs in North America. By examining all aspects of these products, it contributes to the
development of more sophisticated policy and management frameworks for not only ensuring their ongoing use but also
protecting the future of our forests. *Commercial Relations of the United States*, 1881 **United States Census of**
