Drugs Marcel Gielen, 2013-06-29 Whereas platinum compounds are already clinically used as anticancer agents tin compounds exhibiting high enough antitumour activity have not yet been found to enter the clinical phase This is paradoxical with the observation that 50% of the tested compounds showed some activity which is an abnormally high percentage This is probably due to the fact that research of this type with tin compounds started more recently than with platinum compounds and that almost exclusively known compounds coming from laboratories working in the field of organotin compounds have been blindly tested Some research directed towards the development of organotin compounds with some biologically favourable properties for instance derivatives with hydrophilic or lipophilic or with increased bio availability characteristics has started only recently We thought that was now the appropriate time to bring together experts from different disciplines biochemists pharmacologists organotin chemists oncologists etc working in the field of tin based antitumour drugs to contribute to the critical assessment of existing knowledge in this new important topic to identify the directions for future research and to promote close working relations between the different countries and professional experiences gathered in this workshop **Radiation Safety Guide for Nuclear Medicine Professionals** Pankaj Tandon, Dibya Prakash, Subhash Chand Kheruka, Nagesh N Bhat, 2022-11-15 The book covers all the radiation safety aspects while working with unsealed radionuclides Radiation safety plays a significant role in routine nuclear medicine practices and is necessary to protect occupational workers patients members of the general public and the environment A fair knowledge of radiation safety is expected from all nuclear medicine professionals Chapters include basics of radiation physics biological bases of radiation protection planning and design of nuclear medicine facilities cyclotron and high dose therapy facilities radiation safety considerations in nuclear medicine cyclotron while preparing radiopharmaceuticals It also includes the working mechanism

of radiation detectors quality assurance of positron emission tomography PET and gamma camera including single photon emission computed tomography SPECT emergency preparedness plan nuclear medicine and CT dosimetry transport regulations the role of national regulatory authorities and radioactive waste management The last chapter provides probable model questions asked in the radiological safety officer certification examination and includes 250 multiple choice questions MCQs 100 true or false 60 fill in the blanks and 40 match the following questions The book is written in a simple language for a better understanding of the occupational workers of any grade It serves as reference material for nuclear medicine professionals on radiation safety related to planning quality assurance dosimetry and various regulations pertaining to nuclear medicine It is a ready reckoner for the students pursuing a degree diploma in nuclear medicine and preparing for certification courses in radiation safety to understand the subject matter along with options to attempt practice questions

Radiation Protection In The Health Sciences (With Problem Solutions Manual) (2nd Edition) Marilyn E Noz, Gerald Q Maguire Jr, 2007-04-12 This book takes a very practical approach to radiation protection and presents very readable information for anyone working in the radiation field or with radioactive material Offering information rarely found elsewhere the authors describe in detail both the basic principles and practical implementation recommendations of radiation protection Each chapter includes self assessment review questions and problems with answers provided to help readers master important information Coupled with a teacher s manual this book is highly suitable as an undergraduate text for students preparing for careers as X ray radiation oncology or nuclear medicine technologists It can also be used as a reference for residents in radiology and radiation oncology medical personnel or anyone working with radioactive materials such as those involved in homeland security emergency services or employed at a nuclear power plant Annual Research Progress Report - US Army Institute of Surgical Research ,1991
