concert halls and with the advent of electronics they enabled vast pop music festivals No aspect of modern music making has been untouched by the synergy with scientific innovation This is not a one way interaction as the early attempts to make recordings were a major motivating force to design the electronics for amplifiers and these in turn inspired and enabled the designs of semiconductor electronics and modern computer technology To appreciate the impact of technology on music does not require any prior scientific background as the concepts are invariably extremely simple and are presented here without technical detail Understanding music and why we like different genres is far more complex as this involves our personal background and taste Both aspects change with time and there is no contradiction in enjoying items as diverse as baroque madrigals symphonies jazz or pop music or music from totally different cultures
