Kelly,2011-08-21 Max Scheler and Nicolai Hartmann developed ethics upon a phenomenological basis This volume demonstrates that their contributions to a material ethics of value are complementary by supplementing the work of one with that of the other we obtain a comprehensive and defensible axiological and moral theory By phenomenology we refer to an intuitive procedure that attempts to describe thematically the insights into essences or the meaning elements of judgments that underlie and make possible our conscious awareness of a world and the evaluative judgments we make of the objects and persons we encounter in the world **Information Ethics** Adam Daniel

Moore,2012-09-01 This anthology focuses on the ethical issues surrounding information control in the broadest sense Anglo American institutions of intellectual property protect and restrict access to vast amounts of information Ideas and expressions captured in music movies paintings processes of manufacture human genetic information and the like are protected domestically and globally The ethical issues and tensions surrounding free speech and information control intersect in at least two important respects First the commons of thought and expression is threatened by institutions of copyright patent and trade secret While institutions of intellectual property may be necessary for innovation and social progress they may also be detrimental when used by the privileged and economically advantaged to control information access consumption and expression Second free speech concerns have been allowed to trump privacy interests in all but the most egregious of cases At the same time our ability to control access to information about ourselves what some call informational privacy is rapidly diminishing Data mining and digital profiling are opening up what most would consider private domains for public consumption and manipulation Post 9 11 issues of national security have run headlong into individual rights to privacy and free speech concerns While constitutional guarantees against unwarranted searches and seizures have been relaxed access to vast amounts of information held by government agencies libraries and other information storehouses has been restricted in the name of national security Formalism in Ethics and Non-formal Ethics of Values Max Scheler,1973 A lengthy critique of Kant s apriorism precedes discussions on the ethical principles of eudaemonism utilitarianism pragmatism and positivism **Explanation in Ethics and Mathematics** Uri D. Leibowitz,Neil Sinclair,2016 How far should our realism extend For many years philosophers of mathematics and philosophers of ethics have worked independently to address the question of how best to understand the entities apparently referred to by mathematical and ethical talk But the similarities between their endeavours are not often emphasised This book provides that emphasis In particular it focuses on two types of argumentative strategies that have been deployed in both areas The first debunking arguments aims to put pressure on realism by emphasising the seeming redundancy of mathematical or moral entities when it comes to explaining our judgements In the moral realm this challenge has been made by Gilbert Harman and Sharon Street in the mathematical realm it is known as the Benacerraf Field problem The second strategy indispensability arguments aims to provide support for realism by emphasising the seeming intellectual indispensability of mathematical or moral entities for example when constructing good explanatory theories This strategy is associated with Quine and Putnam in mathematics and with Nicholas Sturgeon and David Enoch in ethics Explanation in Ethics and Mathematics addresses these issues through an explicitly comparative methodology which we call the companions in illumination approach By considering how argumentative strategies in the philosophy of mathematics might apply to the philosophy of ethics and vice versa the papers collected here break new ground in both areas For good measure two further companions for illumination are also broached the philosophy of chance and the philosophy of religion Collectively these comparisons light up new questions

How Can We Be Equals? Giacomo Floris,Nikolas

Kirby,2024-07-04 That all human beings are one another's moral equals is taken by many to be the fundamental premise of contemporary moral political and legal theory It is also the demand of individuals and groups to be treated as equals that drives much of political practice and protest today However what does such a claim of basic equality between human beings mean How can it possibly be true given that we are unequals in almost every other aspect of our lives And who exactly is meant to fall within its scope This volume brings together leading thinkers on basic equality to address these questions Collectively they explore the concept of equality in history and criticism analysing and presenting solutions to the most pressing challenges that have been raised against the principle

Philosophy and Technology P.T. Durbin, F. Rapp, 2012-12-06 Only recently has the phenomenon of technology become an object of interest for philosophers The first attempts at a philosophy of technology date back scarcely a hundred years a span of time extremely short when compared with the antiquity of philosophical reflections on nature science and society Over that hundred year span speculative critical and empiricist approaches of various sorts have been put forward Nevertheless even now there remains a broad gap between the importance of technology in the real world and the sparse number of philosophical works dedicated to the understanding of modern technology As a result of the complex structure of modern technology it can be dealt with in very different ways These range from metaphysical exposition to efforts aimed at political consensus Quite naturally within such a broad range certain national accents can be discovered they are shaped by a common language accepted philosophical traditions and concrete problems requiring consideration Even so the worldwide impact of technology its penetration into all spheres of individual social and cultural life together with the urgency of the problems raised in this context all these demand a joint philosophical discussion that transcends the barriers of language and cultural differences The papers printed here are intended to exemplify such an effort at culture transcending philosophical discussion
