Basic Investing Guide For The New Investor:

Basic Investing Guide for the New Investor Alfred V. Scillitani, 2002 **The Ultimate Guide for Brand New Investors & Traders** Richard Christopher, This book is written for brand new aspiring day traders who have zero experience and are looking for the information they need to get started the right way from the first day If you are already trading real money having great success I encourage you to keep it going this book is going to be very elementary for you This book is the bible for brand new investors and traders who need to start somewhere This is the place What you will learn in this book will fast track your knowledge of what you need to know to get started learning You can perhaps go from knowing 0 to trading and making real money in the live markets in as little as 30 days to a couple of months if you do what it says in this book This time frame is not etched in stone and may well take you less or more time depending on how fast you grasp the basic principles of this book and how fast you can employ them in a live market environment with real money If you would like to learn to trade and invest in the markets any markets and trade and invest in them the right way from the very start of your trading and investing education career then I highly recommend you pay attention and do what it says in this book If you are a brand new beginner you should read every single page in this book Multiple times if need be This book is meant to expedite your learning curve which can sometimes be long and costly Sure you can Google this or that information however it would take you many years to learn what I am going to tell you in this book before you could invest any of your hard earned real money in the live markets and have a chance making real money This first book in the series is meant to give you the basic information you need to make a decision as to whether to get into this business or not You can screw around and waste a lot of training and education time on things that won't help you to make money in the live market or you can learn to trade by focusing on the reality of how markets work and how money is really made and lost in markets This means quantifying real demand and supply in a market and then buying low and selling high just like you do in everyday in every other part of life buying at wholesale and selling at retail The live market is no different Do you want to make money right away in the live market or waste time and perhaps A LOT OF MONEY on doing things the wrong way from the start the cost of which can be steep and be an account killer and no one wants that right I have written this book in a way I feel the progression of information should be learned to be able to go into the live markets with confidence and no fear The principles in this book can be used in any liquid market on any time frame it does not matter This is what makes the information so valuable By the time you are finished with this book you should have learned the following What money management is and why you need to learn it first Why you need to master your own psychology to work in the live market Why you must always work with a rule based plan You will have learned to quantify and monetize fear Read this book study hard go in the market and get your money [Canadian Real Estate: A Guide for New Investors](#) Royal York Property Management, 2023-07-02 Canadian Real Estate A Guide for New Investors is a practical and informative guide for individuals interested in navigating
