**Comprehensive Handbook of Psychopathology** Henry E. Adams, 2013-12-18 The major purpose of this handbook is to  
provide a comprehensive review of current clinical descriptions research and theories of psychopathology Descrip tive  
psychopathology is a field that is the foundation of clinical practice and re search in clinical psychology psychiatry psychiatric  
social work psychiatric nursing and allied professions in mental health Psychopathology is often per ceived as a stepchild of  
the more glamorous areas of diagnosis or assessment and therapy or behavioral change Nevertheless it is doubtful that any  
meaningful advancements in these areas will occur until there is a thorough understanding of the behavioral disorders The  
purpose of the present project was to devise a handbook that covered both general and specific topics in psychopathology  
and that would be useful to re searchers practitioners and graduate or other advanced students in the mental health  
professions In order to implement this plan we selected very carefully colleagues whom we respect for their expertise in  
particular fields These include both clinicians and researchers with outstanding national reputations as well as more junior  
behavioral scientists and clinicians who in our opinion will achieve similar recognition in the future The chapters in this book  
lead us to believe that we have chosen wisely We would like to express our appreciation to these authors for their  
outstanding contributions and cooperation      **The Behavioral and Cognitive Neurology of Stroke** Olivier

the emergency care of the condition there have been marked advances in our understanding management and rehabilitation  
of residual deficits This book is about the care of stroke patients focusing on behavioural and cognitive problems It provides a  
comprehensive review of the field covering the diagnostic value of these conditions in the acute and later phases their  
requirements in terms of treatment and management and the likelihood and significance of long term disability This book will  
appeal to all clinicians involved in the care of stroke patients as well as to neuropsychologists other rehabilitation therapists
