Basic Slags Rock Phosphates:

basic slags and rock phosphates George Scott Robertson, Basic Slags and Rock Phosphates (Classic Reprint)
George Scott Robertson, 2017-12-03 Excerpt from Basic Slags and Rock Phosphates The utilisation of basic slag in agriculture is an excellent example of the help that modern science affords to the working farmer A waste product of steel making resulting from a modification by Thomas and Gilchrist in 1878 of the Bessemer process it was at first considered worthless and thrown on the refuse heap The late Prof John Wrightson made field experiments in 1884 and 1885 at Ferryhill and at Downton and showed that the material had noticeable fer tilising value this discovery was confirmed and developed by the systematic pot experiments of Paul Wagner at Darmstadt which began in 1885 and continued for several years afterwards Extensive field tests were made during the nineties by Sir then Professor J J Dobbie and Prof D A Gilchrist at Bangor and by Prof W Somerville and later on by Sir T H Middleton at Cockle Park with the result that a considerable body of information was accumulated as to the effectiveness of basic slag under the various conditions obtaining in practice This has already been summarised by Prof Somerville in the Journal of the Board of Agriculture for 1911 1918 etc Some ten years ago however it became evident that the basic open hearth process would be a serious competitor with the Bessemer process and chemical examination showed that the slag though correctly described as basic slag was altogether different from the material with which the agriculturist had become familiar The upheaval caused by war and post war conditions gave an enormous impetus to the Open hearth process and it is now extending to so many works that before long the older process will probably cease to be Operated This result is of course distinctly awkward for the agriculturist who sees a valuable fertiliser disappearing and being replaced by one which is more costly and at first sight seems to be nothing like as good About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Film Strips of the U.S. Department of Agriculture Fred Campbell Meier, Furman Lloyd Mulford, Milton Stover Eisenhower, Walter Penn Taylor, Wilbur Reed Mattoon, Arthur Percy Chew, 1930 This publication the thirty first annual Directory of Officials and Organizations Concerned with the Protection of Birds and Game follows the same general form as previous editions

Horticultural Exhibitions Furman Lloyd Mulford, 1930 The object of horticultural shows is to arouse the interest of citizens and their families in plant growth This publication revises and supersedes Department Circular 62 Horticultural Exhibitions and Garden Competitions and provides a framework for organizing competitions

Principles of Plant Nutrition Konrad Mengel, Ernest A. Kirkby, 2012-12-06 This is the 5th edition of a well

established book *Principles of Plant Nutrition* which was first published in 1978. The same format is maintained as in previous editions with the primary aim of the authors to consider major processes in soils and plants that are of relevance to plant nutrition. This new edition gives an up to date account of the scientific advances of the subject by making reference to about 2000 publications. An outstanding feature of the book which distinguishes it from others is its wide approach encompassing not only basic nutrition and physiology but also practical aspects of plant nutrition involving fertilizer usage and crop production of direct importance to human nutrition. Recognizing the international readership of the book the authors as in previous editions have attempted to write in a clear concise style of English for the benefit of the many readers for whom English is not their mother tongue. The book will be of use to undergraduates and postgraduates in Agriculture Horticulture Forestry and Ecology as well as those researching in Plant Nutrition.

Tailoring of Fertilizers for Rice Orvis P. Engelstad, J. G. Getsinger, Paul J. Stangel, 1972. This project has provided stimulus for a multidiscipline approach to improving the efficiency of fertilizers used on rice. It has brought together a group of agronomists and engineers in a balanced approach to meet the project objectives.
Phosphorus in Agriculture: 100 % Zero Ewald Schnug, Luit J. De Kok, 2016-06-14. The title *Phosphorus in Agriculture 100 % Zero* is synonymous for make or break. And it stands up to the promise. This book sends an important message as it delivers background information intrinsic hypotheses validation approaches and legal frameworks all for balanced phosphorus fertilization in agriculture. This implies firstly that the phosphorus requirement of crop is fully satisfied by applying exclusively fertilizers which contain the nutrient in completely available form. Secondly environmental demands through eutrophication and hazardous contaminants must not be compromised. The book identifies equally knowledge gaps and deficits in the transformation and implementation of research into practice. Bottom line is that research delivers the tools for a sustainable phosphorus management while legal frameworks are insufficient.
