mechanisms to develop their happiness to its fullest possible extent Unless our faculties are pathologically impeded we might only have to become aware of these inherent forces to actuate them Improving our happiness seems to be a function of comprehensively revealing our concept of happiness and permitting it to take its natural place The mission of the book is to assist in this process Finding what makes us happy requires that we achieve knowledge of who we are and of what we want It requires us to be mindful of our wishes our needs our personality Once we understand our motivations we must arrange and implement them to their best effect in relation to one another our capacities other humans and our nonhuman environment The book supports us in gaining these insights and in the resulting tasks The book further examines how much happiness we can expect to obtain even under the best circumstances It describes external and internal constraints that threaten our achievements But it also shows perspectives that may enable us to conquer limitations Thus we may not only gain clarity about our happiness but also confidence in its pursuit Visit the book website with the same name to learn more
