Morgan,2017-07-28 In this age of large cities mass culture and ever more massive events people must struggle against an overwhelming crowd of their own creations to maintain human integrity In this manual for human survival Arthur E Morgan offers a solution peaceful existence in the small primary community where more easily than anywhere else people can find a way to live well Ultimately striving to show that the small community is the lifeblood of civilization this volume examines the political organization membership economics health and ethics characteristics of small communities Like Rousseau before him Morgan observes that we have less control over our affairs than in the past In increasing our control of the natural environment human beings have built a social environment so out of scale that it becomes nearly impossible for people to maintain balance The struggle now is less with the natural order than with the social order and preserving human integrity against the plethora of our own creations is the core problem The need to rediscover elementary forms of human existence has been accelerated by the efficiencies of centralized control and mass persuasion In the face of this small communities or intimate groups become the primary pattern in which human beings must live if the good life is to be a realistic goal The timely nature of this volume has grown as the electronic displaces the mechanical as a moral rival to human community **Weber and Toennies** Joseph B. Maier,2017-09-08 This collection of selected essays by Werner J Cahnman brings together out of scattered dispersion his writings about Max Weber Ferdinand Toennies and historical sociology The great theoretical range and depth of his intellect and mastery of sociological thinking is apparent as he discusses the impact of romanticism on modern thought and how Weber and Toennies both analyzed and reacted to

modernity Cahnman places Weber 1864 1920 the dominant figure in twentieth century sociology in the midst of the methodological controversies so characteristic of contemporary social science and he fully discusses the overarching importance of Weberian ideal type theory Although less well known than Weber Toennies 1855 1936 was also a sociologist of the first rank He is best remembered for his enormously influential twin concepts Gemeinschaft and Gesellschaft which contributed to our understanding of the historical and sociological basis for the change from premodern to modern societies The essays in this volume establish Toennies intellectual connections to Karl Marx Max Weber Emile Durkheim and Herbert Spencer and clarify his influence upon American sociology Cahnman stood against strict separations between history and sociology and his essays are all informed by a wonderful admixture of the theoretical and the concrete They demonstrate how a genuine historical sociology not unlike that of Weber and Toennies can find and explain linkages between seemingly disparate events spanning time and place This volume will be of interest to sociologists political scientists and intellectual historians
