

Curriculum Reform and Curriculum Theory: a case of historical amnesia

IVOR GOODSON

Professor, Faculty of Education, University of Western Ontario

The school curriculum is a social artefact, conceived of and made for deliberate human purposes. It is therefore a supreme paradox that in many accounts of schooling the written curriculum, this most manifest of social constructions, has been treated as a given. Moreover the problem has been compounded by the fact that it has often been treated as a *neutral* given embedded in an otherwise meaningful and complex situation. Yet in our own schooling we know very well that while we loved some subjects, topics or lessons, we hated others. Some we learnt easily and willingly, others we rejected whole-heartedly. Sometimes the variable was the teacher, or the time, or the room, or us, but often it was the form or content of the curriculum itself. Of course beyond such individualistic responses there were, and are, significant collective responses to curriculum, and again when patterns can be discerned it suggests this is far from a 'neutral' factor.

Why then, has so little attention been given to the making of curriculum? We have a social construction which sits at the heart of the process by which we educate our children. Yet in spite of the patchy exhortations of sociologists, sociologists of knowledge in particular, one looks in vain for serious study of the process of social construction which emanates as curriculum.

The reasons for this lacuna in our educational studies can be focused on two specific aspects: first, the nature of curriculum as a *source* for study, and secondly, associated with this, questions relating to the *methods* we employ in approaching the study of curriculum.

In this article I shall deal with some of the problems involved in employing curriculum as a *source*. Part of the problem has already been mentioned: namely that many accounts of schooling accept the curriculum as a given, an inevitable and essentially unimportant variable. Of course, some important work in the fields of curriculum studies and sociology of knowledge have provided a continuing challenge to this kind of curriculum myopia.

But once it accepted that the curriculum itself is an important source for study a number of further problems surface. For 'the curriculum' is a perennially elusive and multi-faceted concept. The curriculum is such a slippery concept because it is defined, redefined and negotiated at a number of levels and in a number of arenas. It would be impossible to arbitrate over which points in the ongoing negotiations were critical. In addition, the terrain differs substantially according to local or national
