Circumstances and events generating legal issues in sport are similarly universal, but sport operates under many legal systems worldwide. Fragmentation and inconsistency in legal outcomes often result. This innovative collection of essays by leading scholars of sports law addresses a gap in the literature. It advances understanding of how different legal systems respond to common issues and offers insights into the developing international system of sports law. Andrew Zimbalist, Smith College, US. This Handbook presents a comprehensive collection of essays by leading scholars and practitioners in the burgeoning field of international sports law. The authors address significant legal issues on two gradually converging tracks: the mainstream institutional framework of the law, primarily the International Olympic Committee, international sports federations, regional and national sports authority, and the Court of Arbitration for Sport; and the commercial sports industry. Topics include the institutional structure, fundamental issues, legal principles and decisions within those institutions, mediation, arbitration and litigation of disputes, doping, gambling, and the expanding use of technology in competition, athlete eligibility requirements, discrimination, and protection of athletes. The book also covers a broad range of commercial issues related to competition law and labor markets, media image and intellectual property rights, event sponsorships, and players' agents. Comparative analyses of young sports models and
