correct grammatical use and non predicators words that do not require such completion and provides rigorous procedures for describing the syntactic semantic and lexical requirements that predicators impose on the words that complete their meaning The inclusion of semantic function and feature descriptions in Case Frame analysis permits the development of a new genre of lexicon that specifies not only syntactic and lexical information as do traditional dictionaries but detailed semantic information The resulting Case Frame lexicon entries are both more compact and more nuanced than traditional lexicon entries Danove conducts an exhaustive Case Frame analysis of the ditransitive verbs of transference in the New Testament He uses this analysis to develop a set of descriptive guidelines for interpreting and translating the various usages of ditransitive verbs of transference and applies these rules in exegetical studies of the text of the New Testament to generate a Case Frame lexicon of the verbs of transference in the New Testament This study will distinguish the requirements of the 127 New Testament verbs of transference according to four syntactic functions twelve semantic functions and 22 lexical realizations This will permit a rigorous investigation of all occurrences of verbal complements with the same syntactic semantic and lexical attributes The study also will consider the influence of one semantic feature an inherent quality of words that has implications for their lexical realization and of the intrusion of four grammatical constructions inherent structuring templates of grammar that govern syntactic semantic and lexical attributes and modify meaning on each category of complements with the same syntactic semantic and lexical description This will produce a rigorous description of meaning that becomes the basis for Danove s contributions to the linguistic study of biblical Greek and to the exegesis of biblical texts      **Augmentative and Alternative Communication** Filip Loncke,2020-10-09

**Augmentative and Alternative Communication Models and Applications** Second Edition describes augmentative and alternative communication AAC comprehensively and offers a framework for understanding how AAC intervention can be used in the process of communication This textbook is intended to serve as the primary text for graduate level courses in augmentative and alternative communication in speech language pathology programs It also serves as an essential resource for practicing clinicians AAC is used by an ever growing group of individuals of all ages each with their own personal and communication needs The book presents the various AAC interventions and teaches the prospective clinician which intervention may be effective depending on the needs condition and prognosis of the client The text details how communication is shaped by internal and external factors and how communication affects social functioning New to the Second Edition A revised introductory chapter reflecting recent changes in the field Thoroughly updated chapters on technology vocabulary and assessment Reorganization of the chapters for a more natural flow of information New and revised artwork throughout including images tables and charts New and expanded case studies covering different types of communicators their needs and AAC solutions Expanded coverage on the following topics The debate on core vocabulary and discussion of best practices Perspectives and views from AAC users Ethics in AAC service delivery Research issues      **South**
