 France, 1493-1725* Frank C. Spooner,1972 This volume makes available the first English version of *L'conomie mondiale et les
 frappes monétaires en France 1493-1680* Frank C Spooner's original and distinguished contribution to economic and
 monetary history Generously illustrated with maps and graphs and abridged by the author this study introduces the English
 reading audience to the methodological approaches of the modern school of French economic history In this edition Spooner
 covers an additional forty five years not included in his original work the period 1680-1725 which marks the prelude to the
 great monetary reform and consolidation of France in 1726 In addition to bringing the reader up to date on his continuing
 research he presents a number of important conclusions concerning this economic era Drawing from his vast insight into
 French monetary history and his thorough technical knowledge of French coinage and mints of the period the author maps
 the historical and spatial perspectives of the two and a half centuries when France experienced successive periods of
 inflation as bullion copper and credit emerged into the forefront of economic affairs To illustrate the way in which the
 sequence of these periods affected the structure of the French economy he discusses how the relative supply and demand of
 the metals used in varying degrees as a medium of exchange increased the demand for the metal and influenced the credit
 system Credit thus made a special contribution in coordinating and adjusting the various inconsistencies in the production
 and circulation of the different metals Throughout his study Spooner attributes an important role to money as a significant
 factor in economic change and development in early modern Europe and focuses on the relationship between the supply of
 money and the level and pattern of economic activity **KPSC KAS Prelims Exam (Paper-1) Book 2024 | Karnataka
