Conclusions **Japanese Understanding of Salvation** Martin Heißwolf,2018-02-14 It is no secret that Christianity has

been widely rejected in Japan with less than two percent of the population identifying as Christian The dominant worldview
in Japan is deeply animistic with beliefs such as the Japanese mana concept ki the Japanese soul concept and the concept of
God god s kami being deeply rooted in the culture and fundamentally influencing society Dr Martin Hei wolf with his years of
experience in Japan critically examines Japanese animism in light of core Christian beliefs such as the concepts of peace and
salvation Central to Japanese people s rejection of Christian truth is the diametric opposition of its supernatural message to
the natural focus of Japanese animistic folk religion Hei wolf s meticulous study is framed squarely within missiological
thought and praxis so Christians serving in Japanese contexts are better able to communicate the message of the gospel by
more fully understanding Japanese people people by whom God wants to be known Japan Tax Guide Volume 1 Strategic

and Industrial Relations:China and Japan After World War II Vai Io Lo,1999-01-01 Chinese and Japanese trade unions may
seem emasculated and weak when compared with their Western counterparts in that they do not stand up to management to
protect the interests of workers The author s careful analysis probes the reasons for this difference tearing down
stereotypical notions about societies with a Confucian heritage to examine the significant role of law in shaping industrial
relations in modern China and Japan Through a comparative analysis of their trade union laws this work analyses the role of
law in shaping postwar industrial relations in China and Japan and the interplay amongst such elements as the State or the
Party management and workers The work focuses on industrial relations in commercial and industrial enterprises addressing
such issues as the performance or nonperformance of trade unions in China and Japan and possible explanations and the
prospects and limitations of using codified laws to effect change or control in the postwar industrial settings of these two
countries The work s helpful features include a comparative approach the use of case studies to maximize objectivity and
insight a unified and clearly expressed thesis and conclusions including a summary of findings footnotes and cross references
an index and concise explanations of the relevant legal provisions and the manner in which they have been applied **The**

Transformation of the Japanese Economy Kazuo Sato,2016-09-16 During the rapid growth period of the Japanese
economy from the mid 1950s to the mid 1970s the economic system that became entrenched in Japan the so called Japanese
style capitalism was based on the government business bureaucracy triad Although its distinct features survived the
subsequent two decades of slow growth there are many indications that the Japanese economy is once again struggling to
transform itself These translations from the Japanese economic literature expertly address this transformation

U.S.-Japan Relations Richard B. Finn, Shadow Education and Social Inequalities in Japan Steve R.

Entrich, 2017-12-07 This book examines why Japan has one of the highest enrolment rates in cram schools and private tutoring worldwide It sheds light on the causes of this high dependence on shadow education and its implications for social inequalities The book provides a deep and extensive understanding of the role of this kind of education in Japan It shows new ways to theoretically and empirically address this issue and offers a comprehensive perspective on the impact of shadow education on social inequality formation that is based on reliable and convincing empirical analyses Contrary to earlier studies the book shows that shadow education does not inevitably result in increasing or persisting inequalities but also inherits the potential to let students overcome their status specific disadvantages and contributes to more opportunities in education Against the background of the continuous expansion and the convergence of shadow education systems across the globe the findings of this book call for similar works in other national contexts particularly Western societies without traditional large scale shadow education markets The book emphasizes the importance and urgency to deal with the modern excesses of educational expansion and education as an institution in which the shadow education industry has made itself seemingly indispensable

developed what is arguably the most sophisticated and the most democratic broadcasting system in the world The Great Kanto Earthquake of 1st September 1923 with its devastation and confusion drove home in its appalling way the importance of being able to broadcast immediate information to the public The same year the Ministry of Communications promptly

established an administrative system to regulate broadcasting In less than a decade over one million people were registered listeners Under the post war Constitution of 1946 freedom of speech and all other forms of expression was guaranteed and the subsequent Broadcast Law instituted a dual system of broadcasting with the public service Nippon Hoso Kyokai NHK on the one hand and commercial and private broadcasting organizations on the other In 1978 there were ninety one television broadcasting organizations and fifty one radio broadcasting organizations In this informative study Professor Ito and his team comprehensively describe the staggering growth of broadcasting in Japan from the dawn of radio and television to satellite communication and through to the multiplex broadcasting of the future
