Can technology change what it means to be human? In this thoroughly revised second edition of Emotional Amoral Egoism, Professor Nayef Al-Rodhan demonstrates the impact of our innate predispositions on key issues from conflict, inequality, and transcultural understanding to Big Data, fake news, and the social contract. However, it is the societies we live in and their governance structures that largely determine how we act on our innate predispositions. Consequently, Al-Rodhan proposes a new and sustainable good governance paradigm which must reconcile the ever-present tension between the three attributes of human nature: Emotional Amoral Egoism and the nine critical needs of human dignity. This book is a perfect resource for enlightened readers, academics, and policy makers interested in how our innate instincts and tendencies shape the world we live in and how the interplay between neurophilosophy and policy can be harnessed for pragmatic and sustainable peace, security, and prosperity solutions for all at all times and under all circumstances.

Geographical Thought Lalita Rana, 2014-01-01. Geographical thought at any point in time is a manifestation of the prevailing viewpoints and methodological approaches in vogue. The development of geography has a history of evolution of over 2000 years. The discipline has been crafted over time to incorporate ideas from various schools of thought and several other disciplines from ancient to modern times. The existing methodology and the subject matter of Geography is a reflection of this assemblage and evolution. The nature of development remained more philosophical up to the modern period. The First edition of this book published in 2008 was an attempt towards compilation of relevant study material on evolution of Geographic thought in a systematic way up to the modern period. The book has been revised with the addition of two elaborated sections, i.e. one each on the Classical and the Contemporary tradition in geography. However, the major thrust of present book is on the nature of geographic developments in its contemporary phase. More recently, the anthropocentrism and a concern about methodology are more evident in the development of discipline.

Phenomenology and Existentialism in the Twentieth Century Anna-Teresa Tymieniecka, 2009-09-30. Phenomenology and existentialism transformed understanding and experience of the Twentieth Century to their core. They had strikingly different inspirations and yet the two waves of thought became merged as both movements flourished. The present collection of research devoted to these movements and their unfolding interaction is now especially revealing. The studies in this first volume to be followed by two succeeding ones range from the predecessors of existentialism: Kierkegaard, Jean Wahl, Nietzsche to the work of its adherents: Shestov, Berdyaev, Unamuno, Blondel, Blumenberg, Heidegger and Mamardashvili, Dufrenoy and Merleau-Ponty to existentialism's congruence with Christianity or with atheism. Among the leading Husserlian insights are treated: essence and experience, the place of questioning ethics and intentionality, temporality and passivity and the life-world. The following book will uncover the perennial concerns guiding the wondrous interplay of these two inspirational sources.
