by experienced filmmaker film school teacher and author Blain Brown this book emphasizes how the image the mood and the visual impact of a film are to a great extent determined by the skill and sensitivity of the director of photography in using lighting It provides an indispensable highly illustrated and comprehensive guide to making every scene look its best This new edition has been expanded to provide further guidance at the introductory level for students those just starting their careers and people already working in the business who want to move up Topics include Lighting Sources LEDs The Lighting Process Lighting Basics Controlling Light Lighting Scenes A Lighting Playbook Storytelling With Light Electricity and Distribution Gripology Set Operations Technical Issues A robust accompanying companion website also includes video tutorials and other resources for students and professionals alike including lighting demonstrations basic methods of lighting using diffusion color control and other topics      *Portable Video* Norman J. Medoff, Edward John Fink, 2012 First Published in 2012

Routledge is an imprint of Taylor Francis an informa company      **Stage Lighting** Richard E. Dunham, 2015-10-30 The book's organization follows a layered approach that builds on basic principles Light as a Medium Part 1 Tools of a Lighting Designer Part 2 Design Fundamentals Part 3 and Lighting Applications Part 4 This presents students with a practical and logical sequence when learning basic concepts The full spectrum of the lighting design process is presented in detail giving students an example of how one might develop a lighting design from script analysis through concept and plot development and all the way to an opening This detailed process with a step by step design approach gives students a plan to work from which they can later modify as they mature and gain confidence as designers The text contains a more comprehensive discussion of basic technology light as a physical phenomena and methodology of designs than is found in most introductory texts bridging the gap between introductory and advanced lighting courses The text will appeal to theatrical designers who want to venture into areas of lighting like architectural or virtual lighting design while at the same time gaining a solid grounding in the fundamentals of lighting design Lighting Design will also benefit illuminating engineers who want to move away from mere computational approaches in lighting and on to explore techniques along the design approaches of theatrical lighting design The final 9 chapters cover many specialty areas of lighting design highlighting the unique and shared qualities that exist between the different aspects of these elements Discussions involve traditional entertainment areas like theatre as well as lesser known facets of the industry including film video landscape lighting retail museum lighting virtual lighting concert spectacle performances and architectural lighting Models of design tasks demonstrate the actual use and development of plots sections schedules photometrics tables and cut sheets rather than simply talking about what they are This hands on approach provides students with a firm understanding of how to actually use these tools and processes
