Craft And Consciousness Occupational Technique And The Development Of World Images:

Craft and Consciousness Joseph Bensman, Robert Lilienfeld, 1973 **Craft and Consciousness** Joseph Bensman, Robert Lilienfeld, 1991-01-01 *Craft and Consciousness* Joseph Bensman, Robert Lilienfeld, Long out of print and difficult to come by Bensman and Lilienfeld's treatise has achieved the status of an underground masterwork of sociological thought. An extended and carefully nuanced essay on the sociology of knowledge, its central argument was well defined by the authors in the first edition of 1973. It is our contention that major habits of mind approach the world or in phenomenological terms attitudes towards everyday life and specialized attitudes are extensions of habits of thought that emerge and are developed in the practice of an occupation, profession or craft. We emphasize craft since we focus upon the methods of work, techniques, methodologies and the social arrangements which emerge in the practice of a profession as being decisive in the formation of world views. That argument is advanced against the Marxist tradition that would relate the forms and content of knowledge to the position of the knower in the social, economic and class structure of society. It avails itself of the theories and perceptions of Veblen, Mannheim, Weber, Husserl and Alfred Schutz.

The Social Production of Technical Work Peter Whalley, 1986-01-01. Engineers appear in recent social science as central though somewhat elusive figures. They play a particularly critical role in the various attempts to understand the impact of science based industry on the class structure of advanced capitalist societies. In this book Peter Whalley brings these engineers into sharper focus. He argues that engineers should not be seen as members of a glamorous new class of professionalized knowledge workers nor as a radicalized new working class or partially de-skilled technical proletariat. Rather they should be viewed as trusted employees selected, socialized, trained and rewarded to perform the discretionary tasks necessarily delegated by employers in the complex organizations of advanced capitalism. The book draws extensively on observations and interviews to compare engineers' work and understanding in the high and low tech settings of two British companies: Computergraph, an advanced electronics firm, and Metalco, a traditional British engineering giant. Whalley compares the technical work structure of Britain with those of France and the United States. He argues that the impact of technological change on class structure is critically mediated by nationally specific modes of organizing technical work and producing trusted workers. The book goes beyond cultural explanations of these national variations to examine how they are created and reproduced in the organization of work and the structuring of occupations.

Overcoming Law Richard A. Posner, 1995. Legal theory must become more factual and empirical and less conceptual and polemical. Richard Posner argues in this wide ranging new book. The topics covered include the structure and behavior of the legal profession, constitutional theory, gender, sex and race theories, interdisciplinary approaches to law, the nature of legal reasoning and legal pragmatism. Posner analyzes in witty and passionate prose schools of thought as different as social constructionism and institutional economics and scholars and judges as different as Bruce Ackerman, Robert Bork, Ronald Dworkin, Catharine MacKinnon, Richard Rorty and Patricia

Williams He also engages challenging issues in legal theory that range from the motivations and behavior of judges and the role of rhetoric and analogy in law to the rationale for privacy and blackmail law and the regulation of employment contracts Although written by a sitting judge the book does not avoid controversy it contains frank appraisals of radical feminist and race theories the behavior of the German and British judiciaries in wartime and the excesses of social constructionist theories of sexual behavior Throughout the book is unified by Posner's distinctive stance which is pragmatist in philosophy economic in methodology and liberal in the sense of John Stuart Mill's liberalism in politics Brilliantly written eschewing jargon and technicalities it will make a major contribution to the debate about the role of law in our society

Management in the Human Service Organization United States. Office of Family Assistance, 1980 **Agenda Setting** David Protess, Maxwell

E. McCombs, 2016-07-22 The role of the news media in defining the important issues of the day also known as the agenda setting influence of mass communication has received widespread attention over the past 20 years Since the publication of McCombs and Shaw's seminal empirical study more than one hundred journal articles and monographs have appeared This collection exemplifies the major phases of research on agenda setting tests of the basic hypothesis contingent conditions affecting the strength of this influence the natural history of public issues mass media influence on public policy and the role of external sources from the president to public relations staffs on the news agenda **Continual Permutations of Action**

Anselm L. Strauss, Although it has not been his intention to promulgate theory for its own sake Anselm Strauss has proven himself a formidable theorist What has prompted this new treatise on human action or as Strauss would prefer acting was a dissatisfaction with the accounts of social phenomena in the received mainline sociological literature Derived from the survey and functionalist traditions such accounts have simplified complexities drastically and mostly left implicit the underlying action assumptions of their research Rejecting Parsons and Lazarsfeld as models Strauss traces the perspective on human action presented in *Continual Permutations of Action* to a very different tradition that of the Pragmatists Strauss's account begins with the concept of trajectory referring to a course of action but also embracing the interaction of multiple actors and contingencies Certain Straussian terms and motifs come rapidly into play in the earlier sections where he maps out his account conditional matrix temporality and the like The later sections are given over to major topics including work and its relations with other forms of action the body thought processes symbolizing social worlds and arenas representation the interplay of routine and creative action and the relevance of the concept of social worlds to understanding the interplay of several levels of social order in contemporary society Extending the limits of interactionist theory Strauss has raised questions about interpreting social phenomena that will be debated for some time to come **Discursive Acts** R. Perinbanayagam, Food Safety Law in China Francis Snyder, 2015-12-22 This book is the first major study of the making of transnational food safety law in China Francis Snyder shows how the 2008 melamine infant formula crisis led to China's first food safety law and new food safety standards substantial reforms in government policy and closer relations with

international organisations He also identifies current and future challenges and makes recommendations for dealing with them Chinese food safety law today is influenced strongly by cross border factors While transnational regimes help to shape domestic decisions many institutions deeply embedded in Chinese society have played key roles in this transformation Francis Snyder emphasises that in finding its own path toward ensuring food safety China can both learn from and teach other countries In May 2017 this title has been awarded a Gourmand World Cookbook Award in Yantai Shandong Province China Best in the World in two categories Best Wine Law Book and Food Safety Institutions *Rhythms of Writing* Helena Wulff, 2017-10-05 This is the first anthropological study of writers writing and contemporary literary culture Drawing on the flourishing literary scene in Ireland as the basis for her research Helena Wulff explores the social world of contemporary Irish writers examining fiction novels short stories as well as journalism Discussing writers such as John Banville Roddy Doyle Colm Tóibín Frank McCourt Anne Enright Deirdre Madden and Seamus Heaney Colum McCann David Park and Joseph O'Connor Wulff reveals how the making of a writer's career is built on the rhythms of writing long hours of writing in solitude alternate with public events such as book readings and media appearances Destined to launch a new field of enquiry *Rhythms of Writing* is essential reading for students and scholars in anthropology literary studies creative writing cultural studies and Irish studies *Symbols and Artifacts* Pasquale Gagliardi, 2017-07-05 A selection of 18 papers from an international conference in Milan June 1987 organized by the Standing Conference on Organizational Symbolism Details how corporate artifacts are invested with meaning are related to control and can be used as cultural indicators in research Among the topics are office design housing modifications computer systems and the space shuttle Fairly devoid of specialist jargon *Social Organization and Social Process* David Maines, 2024-11-01 The essays gathered in this volume contain analyses based on the general action perspective of Chicago sociology and in particular on the contributions of Anselm L Strauss whose lengthy achievement this volume honors *The Micropolitics of Knowledge* Emmanuel Lazega, 2024-11-01 For many years Emmanuel Lazega has explored communication behavior and decision making processes of small workgroups within larger organizations To account for the knowledge claims of members of those groups and for the ways in which such claims are legitimated collectively and translated into action he presents a theory of the interactive elaboration of information on which decisions are based *Organizational Communication* Peter K. Manning, 1992-01-01 This book discusses the semiotic and ethnographic bases for organizational analysis including the related fieldwork issues confronting the investigator It explains the importance of rhetorical dramaturgic and phenomenological strategies for the study of organizations The arbitrary and culturally based connections in which organizations abound require an understanding of the particulars of cultural scenes first observed later conceptualized through semiotic theory *Organizational Communication* includes a series of examples from applied semiotics research in nuclear regulatory policy making truth telling regulatory control by among others the police and risk analysis These data provide the basis for a critique of the limits of earlier analyses of organizational

change such as those offered by structuralist theories Dr Manning concludes with an assessment of the postmodernist ethnographic strategies that have evolved as a response to a larger representational crisis and of the implications of these strategies for the study of organizational culture The Challenger Launch Decision Diane Vaughan, 2016-01-04 An in depth account of the events and personal actions which led to a great tragedy in the history of America's space program James D Smith former Solid Rocket Booster Chief NASA Marshall Space Flight Center When the Space Shuttle Challenger exploded on January 28 1986 millions of Americans became bound together in a single historic moment Many still vividly remember exactly where they were and what they were doing when they heard about the tragedy Diane Vaughan recreates the steps leading up to that fateful decision contradicting conventional interpretations to prove that what occurred at NASA was not skullduggery or misconduct but a disastrous mistake Why did NASA managers who not only had all the information prior to the launch but also were warned against it decide to proceed In retelling how the decision unfolded through the eyes of the managers and the engineers Vaughan uncovers an incremental descent into poor judgment supported by a culture of high risk technology She reveals how and why NASA insiders when repeatedly faced with evidence that something was wrong normalized the deviance so that it became acceptable to them In a new preface Vaughan reveals the ramifications for this book and for her when a similar decision making process brought down NASA's Space Shuttle Columbia in 2003 Vaughn finds the traditional explanation of the Challenger accident to be profoundly unsatisfactory One by one she unravels the conclusions of the Rogers Commission The New York Times A landmark study Atlantic Vaughn gives us a rare view into the working level realities of NASA The cumulative force of her argument and evidence is compelling Scientific American

Writing the Social Text Richard Brown, 2017-07-05 During the past decade it has become commonplace to interpret social and cultural reality the very groundwork of the social sciences as linguistic constructions Not only is society viewed as a text but scientific texts themselves are seen as rhetorical constructions This collection of scholarly essays begins with an overview of this emerging field and covers the specific stylistic practices by which social scientists create objective or true representations of society The volume closes with a consideration of the more telling challenges to the rhetorics of the social sciences and how these might be encompassed or overcome Media Worlds in the Postjournalism Era David Altheide, 2019-01-08 The concept of media logic a theoretical framework for explaining the relationship between mass media and culture was first introduced in Altheide and Snow's influential work Media Logic In Media Worlds in the Postjournalism Era the authors expand their analysis of how organizational considerations promote a distinctive media logic which in turn is conducive to a media culture They trace the ethnography of that media culture including the knowledge techniques and assumptions that encourage media professionals to acquire particular cognitive and evaluative criteria and thereby present events primarily for the media's own ends *Moral Mazes* Robert Jackall, 1988 Examines the influence of corporate managers in major business scandals and discusses the shaping of personal ethics in bureaucratic systems **Gerontology**

and the Construction of Old Age Bryan Green, 2017-09-08 Although attitudes toward the aged and their care are inherent in any society gerontology itself is a relatively recent field of study and practice Gerontology and the Construction of Old Age applies the methods of discourse analysis and textual analysis to texts and documents in this newly evolved and eclectic field Green explores and identifies the literary methods and discursive regularities through which aging and the aged have been made into objects of study and treatment and which together form a mode of knowledge production that will influence future texts in the field Because such formats of representation limit rational diagnoses of problems and rational courses of ameliorative action policy implications in the field of gerontology are a major interest of this study Another interest is methodological Within the broader constructionist approach to social reality Green takes the position of constitutive realism the notion that social reality is linguistically constructed primarily in speech and writing The book's two aims are to describe analytically the field of gerontology The field is important both for its growing academic presence and for its practical effects on discourse and policy concerning old age It also hopes to help develop possibilities of inquiry associated with the linguistic literary and rhetorical turns of social science in recent years Gerontology and the Construction of Old Age is a substantive investigation at considerable theoretical depth of gerontology itself as well as a methodological treatise with broader implications for social science as it focuses upon the discourse of various professional fields
