Crazy Case Of Robots:

The Achilles Effect Crystal Smith, 2011-02-07 A discussion of pop culture messages about masculinity their impact on boys and the benefits of introducing more gender balance to boys lives When most people think about gender stereotypes and children they envision princesses dolls and pink clothing Few consider the warriors muscle bound action figures and T shirts covered in graffiti and skulls that are assumed to signify masculinity The pop culture environment that surrounds boys introduces them to a world where traditionally masculine traits like toughness aggression and stoicism are highly esteemed and where female influence is all but absent The Achilles Effect explores gender bias in the entertainment aimed at primary school boys focusing on the dominant themes in childrens TV shows toy advertising movies and books gender stereotypes of both sexes male dominance negative portrayals of fathers breaking of the mother son bond and the devaluing of femininity It examines the gender messages sent by pop culture provides strategies for countering these messages and encourages discussion of a vitally important issue that is rarely talked about boys and their often skewed understanding of gender The Achilles Effect is a guide for parents educators and students who want to learn more about male and female stereotypes their continued strong presence in kids pop culture and their effect on young boys *Robots That Kill* Judith A.

Markowitz, 2019-04-11 This book describes real world killer robots using a blend of perspectives Overviews of technologies such as autonomy and artificial intelligence demonstrate how science enables these robots to be effective killers Incisive analyses of social controversies swirling around the design and use of killer robots reveal that science alone will not govern their future Among those disputes is whether fully autonomous robotic weapons should be banned Examinations of killers from the golem to Frankenstein s monster reveal that artificially created beings like them are precursors of real 21st century killer robots This book laces the death and destruction caused by all these killers with science and humor The seamless combination of these elements produces a deeper and richer understanding of the robots around us Summer Bridge

Activities®, Grades 4 - 5 Summer Bridge Activities, 2012-09-01 Summer Bridge Activities R for bridging grades 4 5 is designed specifically for preparing Canadian fourth grade students for the new year ahead Reviewed by Canadian teachers and students this workbook features daily activities in reading writing math and language arts plus a bonus section focusing on character development and healthy lifestyles The exercises are easy to understand and are presented in a way that allows your child to review familiar skills and then be progressively challenged on more difficult subjects Give your children the head start they deserve with this fun easy to use award winning series and make learning a yearlong adventure 160 full colour perforated pages and an answer key **Constructionism in Practice** Yasmin B. Kafai, Mitchel Resnick, 2012-11-12

The digital revolution necessitates but also makes possible radical changes in how and what we learn This book describes a set of innovative educational research projects at the MIT Media Laboratory illustrating how new computational technologies can transform our conceptions of learning education and knowledge The book draws on real world education experiments

conducted in formal and informal contexts from inner city schools and university labs to neighborhoods and after school clubhouses The papers in this book are divided in four interrelated sections as follows Perspectives in Constructionism further develops the intellectual underpinnings of constructionist theory This section looks closely at the role of perspective taking in learning and discusses how both cognitive and affective processes play a central role in building connections between old and new knowledge Learning through Design analyzes the relationship between designing and learning and discusses ways that design activities can provide personally meaningful contexts for learning This section investigates how and why children can learn through the processes of constructing artifacts such as games textile patterns robots and interactive devices Learning in Communities focuses on the social aspects of constructionist learning recognizing that how people learn is deeply influenced by the communities and cultures with which they interact It examines the nature of learning in classroom inner city and virtual communities Learning about Systems examines how students make sense of biological technological and mathematical systems This section explores the conceptual and epistemological barriers to learning about feedback self organization and probability and it discusses new technological tools and activities that can help people develop new ways of thinking about these phenomena

Person, Thing, Robot David J. Gunkel,2023-09-05 Why robots defy our existing moral and legal categories and how to revolutionize the way we think about them Robots are a curious sort of thing On the one hand they are technological artifacts and thus things On the other hand they seem to have social presence because they talk and interact

with us and simulate the capabilities commonly associated with personhood In *Person Thing Robot* David J Gunkel sets out to answer the vexing question What exactly is a robot Rather than try to fit robots into the existing categories by way of arguing for either their reification or personification however Gunkel argues for a revolutionary reformulation of the entire system developing a new moral and legal ontology for the twenty first century and beyond In this book Gunkel investigates how and why efforts to use existing categories to classify robots fail argues that robot designates an irreducible anomaly in the existing ontology and formulates an alternative that restructures the ontological order in both moral philosophy and law *Person Thing Robot* not only addresses the issues that are relevant to students teachers and researchers working in the fields of moral philosophy philosophy of technology science and technology studies STS and AI robot law and policy but it also speaks to controversies that are important to AI researchers robotics engineers and computer scientists concerned with the social consequences of their work

The Proud Robot Henry Kuttner,2012-01-15 Gallegher s robot was a beautiful genius with a talent for troubleExcerptThings often happened to Gallegher who played at science by ear He was as he often remarked a casual genius Sometimes he d start with a twist of wire a few batteries and a button hook and before he finished he might contrive a new type of refrigerating unit At the moment he was nursing a hangover A disjointed lanky vaguely boneless man with a lock of dark hair falling untidily over his forehead he lay on the couch in the lab and manipulated his mechanical liquor bar A very dry Martini drizzled slowly from the spigot into his receptive mouth He was trying to remember something but not trying too hard It had to do with the robot of course Well it didn t matter Hey Joe Gallegher said The robot stood proudly before the mirror and

examined its innards Its hull was transparent and wheels were going around at a great rate inside When you call me that Joe remarked whisper And get that cat out of here Your ears aren't that good They are I can hear the cat walking about all right What does it sound like Gallagher inquired interested Jest like drums said the robot with a put upon air And when you talk it is like thunder Joe's voice was a discordant squeak so Gallagher meditated on saying something about glass houses and casting the first stone He brought his attention with some effort to the luminous door panel where a shadow loomed a familiar shadow Gallagher thought It's Brock the annunciator said Harrison Brock Let me in The door's unlocked Gallagher didn't stir He looked gravely at the well dressed middle aged man who came in and tried to remember Brock was between forty and fifty he had a smoothly massaged cleanshaven face and wore an expression of harassed intolerance Probably Gallagher knew the man He wasn't sure Oh well
