Baudelaire in Song Helen Abbott, 2017 This book looks at a key 50 year period 1880-1930 in France and Europe to see how and why Baudelaire's poetry has been set to music in classical music how composers have completely manipulated the texts which poems they have chosen and why *Crisis Music* John Caps, 2021-10-27 Story-like chapters profile six twentieth-century reactive composers not the most famous pillars of the period but lesser-known perhaps more approachable characters whose stories span that 1900-2000 period from decadent fin de siècle Vienna Alban Berg Alexander Zemlinsky to war-torn Paris Olivier Messiaen Arthur Honegger to the Cold War tensions of East vs West Tatu Takemitsu and late-century Communism Arvo Part Their stories were all very different crises and they produced very different kinds of music each very telling of their composers' life and times *Crisis Music* presents each brief biography almost like a detective story looking for motives then spotlights one particular piece of music from each composer that emerged directly out of hard times maybe a political crisis at the time of composition Hitler marching into Paris or later Communist crack-downs or some personal angst such as illness or scandal and how that music contains and expresses crisis In short the subject for discussion is how context

influences content Such troubled and especially vivid composition crisis music can often be most compelling and meaningful for its composer and for its time Indeed their music also seems to have a special resonance to share with our own crisis prone times And meanwhile Western music history played out its own story from late romantic style to Serialism and Minimalism to the anything goes Pluralism we hear today Crisis Music sparks the discussion about how history biography and music intersects At the behest of music teachers at secondary and tertiary levels Crisis Music contains substantive Discussion Questions geared for classroom use **A Dictionary of Music Titles** Adrian Room,2024-10-15 The title of a great musical composition is not always a clear or simple matter An allusive title particularly in a foreign language or a title that does not seem related to the work can confuse even the most devoted music lover Here are histories of the creation of 3 500 titles for symphonies operas oratorios ballets orchestral works choral works chamber music keyboard compositions and songs ranging from the popular to the obscure Each entry arranged by English French German Italian or Spanish title includes alternate titles where appropriate the composer s name date of composition and first performance opus number where appropriate a description of the work and the origin of the title or any story behind it A bibliography and an index conclude the work
