**Interactive Theorem Proving** Matt Kaufmann, Lawrence C. Paulson, 2010-06-30 This volume contains the papers presented at ITP 2010 the First International Conference on Interactive Theorem Proving It was held during July 11 14 2010 in Edinburgh Scotland as part of the Federated Logic Conference FLoC July 9 21 2010 alongside the other FLoC conferences and workshops ITP combines the communities of two venerable meetings the TPHOLs conference and the ACL2 workshop The former conference originated in 1988 as a workshop for users of the HOL proof assistant The first two meetings were at the University of Cambridge but afterwards they were held in a variety of venues By 1992 the workshop acquired the name Higher Order Logic Theorem Proving and Its Applications In 1996 it was christened anew as Theorem Proving in Higher Order Logics TPHOLs for short and was henceforth organized as a conference Each of these transitions broadened the meeting's scope from the original HOL system to include other proof assistants based on forms of high order logic including Coq Isabelle and PVS TPHOLs has regularly published research done using ACL2 the modern version of the well known Boyer Moore theorem prover even though ACL2 implements a unique computational form of first order logic The ACL2 community has run its own series of workshops since 1999 By merging TPHOLs with the ACL2 workshop we include a broader community of researchers who work with interactive proof tools With our enlarged community it was not surprising that ITP attracted a record breaking 74 submissions each of which was reviewed by at least three Programme Committee members

**Interactive Theorem Proving** Jeremy Avigad, Assia Mahboubi, 2018-07-03 This book constitutes the refereed proceedings of the 9th International Conference on Interactive Theorem Proving ITP 2018 held in Oxford UK in July 2018 The 32 full papers and 5 short papers presented were carefully reviewed and selected from 65 submissions The papers feature research in the area of logical frameworks and interactive proof assistants The topics include theoretical foundations and implementation aspects of the technology as well as applications to verifying hardware and software systems to ensure their safety and security and applications to the formal verification of mathematical results Chapters 2 10 26 29 30 and 37 are available open access under a Creative Commons Attribution 4.0 International License via [link.springer.com](https://link.springer.com)

**Computer Algebra Handbook** Johannes Grabmeier, Erich Kaltofen, Volker Weispfenning, 2012-12-06 Two ideas lie gleaming on the jeweler's velvet The first is the calculus the second the algorithm The calculus and the rich body of mathematical analysis to which it gave rise made modern science possible but it has been the algorithm that has made possible the modern world David Berlinski The Advent of the Algorithm First there was the concept of integers then there were symbols for integers I II III 1 11 111 fttt what might be called a sticks and stones representation I II III IV V Roman numerals 1 2 3 4 5 Arabic numerals etc Then there were other concepts with symbols for them and algorithms sometimes for manipulating the new symbols Then came collections of mathematical knowledge tables of mathematical computations theorems of general results Soon after algorithms came devices that provided assistance for carrying out computations Then

mathematical knowledge was organized and structured into several related concepts and symbols logic algebra analysis topology algebraic geometry number theory combinatorics etc This organization and abstraction lead to new algorithms and new fields like universal algebra But always our symbol systems reflected and influenced our thinking our concepts and our algorithms

**Artificial Neural Nets and Genetic Algorithms** George D. Smith, Nigel C. Steele, Rudolf F. Albrecht, 2012-12-06 This is the third in a series of conferences devoted primarily to the theory and applications of artificial neural networks and genetic algorithms The first such event was held in Innsbruck Austria in April 1993 the second in Ales France in April 1995 We are pleased to host the 1997 event in the mediaeval city of Norwich England and to carry on the fine tradition set by its predecessors of providing a relaxed and stimulating environment for both established and emerging researchers working in these and other related fields This series of conferences is unique in recognising the relation between the two main themes of artificial neural

networks and genetic algorithms each having its origin in a natural process fundamental to life on earth and each now well established as a paradigm fundamental to continuing technological development through the solution of complex industrial commercial and financial problems This is well illustrated in this volume by the numerous applications of both paradigms to new and challenging problems The third key theme of the series therefore is the integration of both technologies either through the use of the genetic algorithm to construct the most effective network architecture for the problem in hand or more recently the use of neural networks as approximate fitness functions for a genetic algorithm searching for good solutions in an incomplete solution space i e one for which the fitness is not easily established for every possible solution instance
