Kostrikin,I.R. Shafarevich,2012-12-06 The algebra of square matrices of size $n \times n$ over the field of complex numbers is evidently the best known example of a non commutative algebra Subalgebras and subrings of this algebra for example the ring of $n \times n$ matrices with integral entries arise naturally in many areas of mathematics Historically however the study of matrix algebras was preceded by the discovery of quaternions which introduced in 1843 by Hamilton found applications in the classical mechanics of the past century Later it turned out that quaternion analysis had important applications in field theory The algebra of quaternions has become one of the classical mathematical objects it is used for instance in algebra geometry and topology We will briefly focus on other examples of non commutative rings and algebras which arise naturally in mathematics and in mathematical physics The exterior algebra or Grassmann algebra is widely used in differential geometry for example in geometric theory of integration Clifford algebras which include exterior algebras as a special case have applications in representation theory and in algebraic topology The Weyl algebra Le algebra of differential operators with polynomial coefficients often appears in the representation theory of Lie algebras In recent years modules over the Weyl algebra and sheaves of such modules became the foundation of the so called microlocal analysis The theory of operator algebras Le *Algebra II Workbook For Dummies* Mary Jane Sterling,2014-05-20 To succeed in Algebra II start practicing now Algebra II builds on your Algebra I skills to prepare you for trigonometry calculus and a of myriad STEM topics Working through practice problems helps students better ingest and retain lesson content creating a solid foundation to build on for future success Algebra II Workbook For Dummies 2nd Edition helps you learn Algebra II by doing Algebra II Author and math professor Mary Jane Sterling walks you through the entire course showing you how to approach and solve the problems you encounter in class You ll begin by refreshing your Algebra I skills because you ll need a strong foundation to build upon From there you ll work through practice problems to clarify concepts and improve understanding and retention Revisit
