Understanding and Bridging the Gap between Neuromorphic Computing and Machine Learning, volume II Huajin Tang,Lei Deng ,Kaushik Roy,2024-08-26 Towards the long standing dream of artificial intelligence two solution paths have been paved i neuroscience driven neuromorphic computing ii computer science driven machine learning The former targets at harnessing neuroscience to obtain insights for brain like processing by studying the detailed implementation of neural

dynamics circuits coding and learning Although our understanding of how the brain works is still very limited this bio plausible way offers an appealing promise for future general intelligence In contrast the latter aims at solving practical tasks typically formulated as a cost function with high accuracy by eschewing most neuroscience details in favor of brute force optimization and feeding a large volume of data With the help of big data e g ImageNet high performance processors e g GPU TPU effective training algorithms e g artificial neural networks with gradient descent training and easy to use design tools e g Pytorch Tensorflow machine learning has achieved superior performance in a broad spectrum of scenarios Although acclaimed for the biological plausibility and the low power advantage benefit from the spike signals and event driven processing there are ongoing debates and skepticisms about neuromorphic computing since it usually performs worse than machine learning in practical tasks especially in terms of the accuracy

In-Memory Computing Hardware Accelerators for Data-Intensive Applications Baker Mohammad,Yasmin Halawani,2023-09-25 This book describes the state of the art of technology and research on In Memory Computing Hardware Accelerators for Data Intensive Applications The authors discuss how processing centric computing has become insufficient to meet target requirements and how Memory centric computing may be better suited for the needs of current applications This reveals for readers how current and emerging memory technologies are causing a shift in the computing paradigm The authors do deep dive discussions on volatile and non volatile memory technologies covering their basic memory cell structures operations different computational memory designs and the challenges associated with them Specific case studies and potential applications are provided along with their current status and commercial availability in the market

Handbook on Decision Making Julian Andres Zapata-Cortes,Cuauhtémoc Sánchez-Ramírez,Giner Alor-Hernández,Jorge Luis García-Alcaraz,2022-09-26 This book presents different techniques and methodologies used to improve the intelligent decision making process and increase the likelihood of success in companies of different sectors such as Financial Services Education Supply Chain Energy Systems Health Services and others The book contains and consolidates innovative and high quality research contributions regarding the implementation of techniques and methodologies applied in different sectors The scope is to disseminate current trends knowledge in the implementation of artificial intelligence techniques and methodologies in different fields such as Logistics Software Development Big Data Internet of Things Simulation among others The book contents are useful for Ph D researchers Ph D students master and undergraduate students of different areas such as Industrial Engineering Computer Science Information Systems Data Analytics and others

Wireless Algorithms, Systems, and Applications Sriram Chellappan,Wei Cheng,Wei Li,2018-06-13 This book constitutes the proceedings of the 13th International Conference on Wireless Algorithms Systems and Applications WASA 2018 held in Tianjin China in June 2018 The 59 full papers and 18 short papers presented in this book were carefully reviewed and selected from 197 submissions The papers cover various topics such as cognitive radio networks wireless sensor networks cyber physical systems distributed and localized algorithm design

and analysis information and coding theory for wireless networks localization mobile cloud computing topology control and coverage security and privacy underwater and underground networks vehicular networks internet of things information processing and data management programmable service interfaces energy efficient algorithms system and protocol design operating system and middle ware support and experimental test beds models and case studies *Government Reports Announcements* ,1974 *U.S. Government Research & Development Reports* ,1969 **Scientific and Technical**

Smart Sensors and Systems Chong-Min Kyung,Hiroto Yasuura,Yongpan Liu,Youn-Long Lin,2016-10-16 This book describes the technology used for effective sensing of our physical world and intelligent processing techniques for sensed information which are essential to the success of Internet of Things IoT The authors provide a multidisciplinary view of sensor technology from materials process circuits and big data domains and showcase smart sensor systems in real applications including smart home transportation medical environmental agricultural etc Unlike earlier books on sensors this book provides a global view on smart sensors covering abstraction levels from device circuit systems and algorithms

Handbook of Research on Novel Soft Computing Intelligent Algorithms: Theory and Practical Applications Vasant, Pandian M.,2013-08-31 This book explores emerging technologies and best practices designed to effectively address concerns inherent in properly optimizing advanced systems demonstrating applications in areas such as bio engineering space exploration industrial informatics information security and nuclear and renewable energies Provided by publisher

Database Systems for Advanced Applications '97 Rodney Topor,Katsumi Tanaka,1997 This volume contains the proceedings of the Fifth International Conference on Database Systems for Advanced Applications DASFAA 97 DASFAA 97 focused on advanced database technologies and their applications The 55 papers in this volume cover a wide range of areas in the field of database systems and applications including the rapidly emerging areas of the Internet multimedia and document database systems and should be of great interest to all database system researchers and developers and practitioners Machine Learning and Cryptographic Solutions for Data Protection and Network Security Ruth, J.

Anitha,Mahesh, Vijayalakshmi G. V.,Visalakshi, P.,Uma, R.,Meenakshi, A.,2024-05-31 In the relentless battle against escalating cyber threats data security faces a critical challenge the need for innovative solutions to fortify encryption and decryption processes The increasing frequency and complexity of cyber attacks demand a dynamic approach and this is where the intersection of cryptography and machine learning emerges as a powerful ally As hackers become more adept at exploiting vulnerabilities the book stands as a beacon of insight addressing the urgent need to leverage machine learning techniques in cryptography Machine Learning and Cryptographic Solutions for Data Protection and Network Security unveil the intricate relationship between data security and machine learning and provide a roadmap for implementing these cutting

edge techniques in the field The book equips specialists academics and students in cryptography machine learning and network security with the tools to enhance encryption and decryption procedures by offering theoretical frameworks and the latest empirical research findings Its pages unfold a narrative of collaboration and cross pollination of ideas showcasing how machine learning can be harnessed to sift through vast datasets identify network weak points and predict future cyber threats
