Steinbock, 1995 At a time when many philosophers have concluded that Husserl's philosophy is exhausted but when alternatives appear to be exhausted as well Anthony J Steinbock presents an innovative approach to Husserlian phenomenology His systematic study of the problems and themes of a generative phenomenology normality and abnormality and sociohistorical concepts of homeworld and alienworld and the steps he takes toward developing such a generative phenomenology open new doors for a phenomenology of the social world while casting new light on work done by Husserl himself and by many philosopher working more or less in a Husserlian vein Both critique and an appropriation of a large and diverse body of work Home and Beyond is a major contribution to contemporary Husserl scholarship **Alien Encounter** Dirk Schulze-Makuch, 2013-09-18 It has been nearly 100 years since the Apollo moon landings when Jack and Vladimir two astronauts on a mission to Venus discover a mysterious void related to indigenous life on the planet Subsequently more voids are detected on Earth Mars Titan and quite ominously inside a planetoid emerging from the Kuiper belt Jack is sent to investigate the voids in the Solar System and intercept the planetoid which as becomes increasingly clear is inhabited by alien life forms Jack and his crew will have little time to understand their alien biochemistry abilities behavior patterns resilience and technology but also how these life forms relate to the voids Humankind's first encounter with these exotic life forms couldn't be more fateful becoming a race against time to save life on Earth and to reveal the true nature of the voids which seem to be intrinsically related to life and the universe itself In this novel the author combines many topics related to state of the art research in the field of astrobiology with fictional elements to produce a thrilling page turner This new version significantly develops the astrobiological denouement of the plot and features an extensive non technical appendix where the underlying science is presented and discussed From the reviews of the first edition Voids of Eternity Alien Encounter Here's a thrilling yarn in the best hard SF tradition of Asimov James Hogan and Ben Bova written by a scientist

who knows all about the possibilities of life in the solar system and beyond Dirk Schulze Makuch weaves into his book all the astrobiological themes he's worked on in recent years speculation about creatures in the atmosphere of Venus and on and under the surface of Mars and Titan together with some well informed Eastern philosophy and a cracking good space battle A great first novel from a rising talent Highly recommended David Darling on amazon com 2009 The research interests of Dr Schulze Makuch currently a professor at Washington State University focus on evolutionary adaptation strategies of organisms in their natural environment particularly extreme environments such as found on other planetary bodies Dirk Schulze Makuch is best known for his publications on extraterrestrial life being coauthor of three books on the topic We Are Not Alone Why We Have Already Found Extraterrestrial Life 2010 Cosmic Biology How Life could Evolve on Other Worlds 2010 and Life in the Universe Expectations and Constraints 2004 In 2011 he published with Paul Davies A One Way Mission to Mars Colonizing the Red Planet and in 2012 with David Darling Megacatastrophes Nine Strange Ways the World Could End

Alien Abduction in the Cinema Paul Meehan, 2023-08-03 The alien abduction phenomenon is one of the enduring enigmas of our time While the reality of alien abductions is a hotly debated topic among UFO researchers scientists skeptics and true believers alike the phenomenon indisputably exists as an artifact of popular culture This book analyzes more than 75 films that draw their inspiration from allegedly fact based accounts of alien contact from 1951's The Man from Planet X to Contactee in 2021 These films are examined in terms of both their cinematic qualities and their exploration of thematic elements derived from abduction reports Abduction motifs that appear in science fiction classics such as The Day the Earth Stood Still 2001 and Close Encounters are analyzed as well as those in lesser known films like The Stranger Within Starship Invasions Dark Skies and Proximity Special attention is given to movies based on the famed experiences of abductees Betty and Barney Hill Whitley Strieber and Travis Walton The book also addresses skeptical theories about the origins of the phenomenon in science fiction and examines an uncanny prescience that appears to anticipate these inexplicable occurrences

The New Husserl Donn Welton, 2003-08-21 The essays in this volume provide an alternative approach to Husserl by examining his work and his method as a whole and by probing issues old and new that occupied him during this exceptionally productive period

Meeting the Alien Andreas Anton, Michael Schetsche, 2023-06-22 Is mankind alone in the universe Will we ever encounter intelligent life beyond Earth These questions have been asked for centuries Recent advances in the fields of astrophysics astronomy and astrobiology make it more likely than ever before that Earth may not be the only inhabited planet and that humanity may not be the only intelligent species in the universe What would be the consequences of contact with an extraterrestrial intelligence This question is at the heart of the emerging discipline of exosociology According to the authors first contact with an extraterrestrial intelligence poses enormous risks for humanity These risks come not only from extraterrestrials but above all from ourselves We should be prepared Michael Schetsche and Andreas Anton's comprehensive introduction to exosociology was first published in German in 2019 The book has been

telling of a fortune but rather the rough feeling of what the future might be like The intention in this book is to consider some of these bygone forecasts made by SF and to use this as a prism through which to view current developments in science and technology In each of the ten main chapters dealing in turn with antigravity space travel aliens time travel the nature of reality invisibility robots means of transportation augmentation of the human body and last but not least mad scientists common assumptions once made by the SF community about how the future would turn out are compared with our modern understanding of various scientific phenomena and in some cases with the industrial scaling of computational and technological breakthroughs A further intention is to explain how the predictions and expectations of SF were rooted in the scientific orthodoxy of their day and use this to explore how our scientific understanding of various topics has developed over time as well as to demonstrate how the ideas popularized in SF subsequently influenced working scientists Since gaining a BSc in physics from the University of Bristol and a PhD in theoretical physics from the University of Manchester Stephen Webb has worked in a variety of universities in the UK He is a regular contributor to the Yearbook of Astronomy series and has published an undergraduate textbook on distance determination in astronomy and cosmology as well as several popular science books
