An internationally selected group of experts share their knowledge of a wide range of bioactivities and chemical compound classes. Topics in the chapters describing the modern application of detection, isolation, and structural determination techniques are strongly supported by chapters detailing and reviewing research involving various classes of bioactivity. Research areas include the immunomodulatory, antiviral, cytotoxic, anti-inflammatory, and insect behavior classes of bioactivity. Extensive referencing throughout the text is helpful to those readers not familiar with this subject and serves as a critical review for more experienced researchers. Chromatographic Fingerprint Analysis of Herbal Medicines Hildebert Wagner, Rudolf Bauer, Dieter Melchart, Pei-Gen Xiao, Anton Staudinger, 2011-11-24. This manual to be published in two volumes provides a condensed overview of the analytical investigation of 80 Chinese Herbal Drugs which are most frequently in use. Thin layer chromatographic, high pressure liquid chromatographic, and gas chromatographic fingerprint analytical techniques allow the detection of all main low molecular constituents of a plant drug, and even single constituents can be visualized. Analytical results thereof are shown in numerous color figures. The quality proof of the investigation meets the standard of the European Drug Regulatory Authority. Furthermore, this volume gives a detailed description of the analytical methods used for several drugs. Bioactive constituents, pharmacological and biological activities of several single herbal drugs, as well as their therapeutic applications, are discussed.

*Bioactive Compounds in Phytomedicine* Iraj Rasooli, 2012-01-18

There are significant concerns regarding the potential side effects from the chronic use of conventional drugs such as corticosteroids especially in children Herbal therapy is less expensive more readily available and increasingly becoming common practice all over the world Such practices have both their benefits and risks However herbal self therapy might have serious health consequences due to incorrect self diagnosis inappropriate choice of herbal remedy or adulterated herbal product In addition absence of clinical trials and other traditional safety mechanisms before medicines are introduced to the wider market results in questionable safe dosage ranges which may produce adverse and unexpected outcomes Therefore the use of herbal remedies requires sufficient knowledge about the efficacy safety and proper use of such products Hence it is necessary to

have baseline data regarding the use of herbal remedies and to educate future health professionals about various aspects of herbal remedies      **Stereoselective Synthesis of Drugs and Natural Products** Vasyl Andrushko, Natalia
