Lyn D. English, David Kirshner, 2010-04-02 This book brings together mathematics education research that makes a difference in both theory and practice research that anticipates problems and needed knowledge before they become impediments to progress *Research in Collegiate Mathematics Education II* James J. Kaput, Ed Dubinsky, Alan H. Schoenfeld, 1996 The field of research in collegiate mathematics education has grown rapidly over the past 25 years Many people are convinced that improvement in mathematics education can only come with a greater understanding of what is involved when a student tries to learn mathematics and how pedagogy can be more directly related to the learning process Today there is a substantial body of work and a growing group of researchers addressing both basic and applied issues of mathematics education at the collegiate level This second volume in Research in Collegiate Mathematics Education begins with a paper that attends to methodology and closes with a list of questions The lead off paper describes a distinctive approach to research on key concepts in the undergraduate mathematics curriculum This approach is distinguished from others in several ways especially its integration of research and instruction The papers in this volume exhibit a large diversity in methods and purposes ranging from historical studies to theoretical examinations of the role of gender in mathematics education to practical evaluations of particular practices and circumstances As in RCME I this volume poses a list of questions to the reader related to undergraduate mathematics education The eighteen questions were raised at the first Oberwolfach Conference in Undergraduate Mathematics Education which was held in the Fall of 1995 and are related to both research and curriculum This series is published in cooperation with the Mathematical Association of America

Balogun, 2023-09-20 This book assesses the challenges within the Nigerian educational system and provides a concrete plan to revitalize the low performing system by strengthening high stakes testing at all levels In Nigeria many citizens believe that the solution to the country s low performance in education is to eliminate high stakes standardized testing High stakes testing refers to applying standardized student achievement tests as a primary mechanism

to evaluate students teachers and their school s performance This book argues that the poor quality of education and low ranking of Nigeria s educational system is not related to the negative consequences of high stakes testing but rather is due to many intrinsic factors By conducting a comparative analysis of six high performing education systems worldwide the book offers a comparative summative evaluation of the educational system and offers recommendations This book will be of interest to policymakers and scholars in the fields of African education higher education quality and global studies African studies management and administration leadership and professional development studies Joseph Abiodun Balogun is former Dean and retired Distinguished University Professor at the College of Health Sciences Chicago State University USA Visiting Professor Program Consultant at the Centre of Excellence in Reproductive Health Innovation University of Benin Nigeria and President CEO Joseph Rehabilitation Center Tinley Park Illinois USA
