Courts, Justice, and Efficiency Hector Fix-Fierro, 2004-01-06 This study explores the socio legal context of economic rationality in the legal and judicial systems It examines the meaning and relevance of the concept of efficiency for the operation of courts and court systems seeking to answer questions such as in what sense can we say that the adjudicative process works efficiently What are the relevant criteria for the measurement and assessment of court efficiency Should the courts try to operate efficiently and to what extent is this viable What is the proper relationship between efficiency and justice considerations in a judicial proceeding To answer these questions a conceptual framework is developed on the basis of empirical studies and surveys carried out mainly in the United States Western Europe and Latin America Two basic ideas emerge from it First economic rationality has penetrated the legal and judicial systems at all levels and dimensions from the level of society as a whole to the day to day operation of the courts from the institutional dimension of adjudication to the organizational context of judicial decisions Far from being an alien value in the judicial process efficiency has become an inseparable part of the structure of expectations we place on the legal system Second economic rationality is not the

Constructing White-Collar Crime Joachim J. Savelsberg, 2016-11-11 Criminal law norms are socially derived being constructed in political processes but only recently has criminological research began to focus on the political construction of criminal law There has been increasing interest in the quality of these political processes the decisions that result and the rationales and social forces guiding these decisions In Constructing White Collar Crime Joachim J Savelsberg a sociologist and Peter Br hl a lawyer have provided an interdisciplinary case study of the construction of new German laws against white collar crime relating their results to internationally comparative findings The analysis is empirical it is theoretically grounded in a sociological approach that contrasts Marxist versus pluralist or differentiation theory and functionalist versus conflict group or action theory The authors also analyze their findings in relation to Max Weber s theory of rationalization of law In addition the research is methodologically innovative introducing the technique of cognitive mapping into the study of criminal justice legislation The book represents the authors attempts to bridge the gap between microsociological and macrosociological approaches to the construction of criminal law The authors analyze action rationales communication patterns and power structures as they play out in different stages of the law making process claims making in news media participation of scholars and practitioners in an expert commission and in parliamentary hearings involvement of industrial lobbying groups during the drafting of the bill in the Department of Justice and parliamentary deliberations The analysis demonstrates the considerable weight of economic and political rationales as opposed to justice criteria in the development of criminal legislation It also indicates that white collar crime legislation may have counterproductive consequences The laws are intended to increase the quality of criminal justice by criminalizing the behavior of the powerful but the less powerful groups within the white collar classes are more likely to feel the effects Constructing White Collar Crime will be of interest to students and scholars in the areas of sociology law and criminology

Judges and Their Audiences Lawrence Baum, 2009-01-10 What motivates judges as decision makers Political scientist Lawrence Baum offers a new perspective on this crucial question a perspective based on judges interest in the approval of audiences important to them The conventional scholarly wisdom holds that judges on higher courts seek only to make good law good policy or both In these theories judges are influenced by other people only in limited ways in consequence of their legal and policy goals In contrast Baum argues that the influence of judges audiences is pervasive This influence derives from judges interest in popularity and respect a motivation central to most people Judges care about the regard of audiences because they like that regard in itself not just as

a means to other ends Judges and Their Audiences uses research in social psychology to make the case that audiences shape judges choices in substantial ways Drawing on a broad range of scholarship on judicial decision making and an array of empirical evidence the book then analyzes the potential and actual impact of several audiences including the public other branches of government court colleagues the legal profession and judges social peers Engagingly written this book provides a deeper understanding of key issues concerning judicial behavior on which scholars disagree identifies aspects of judicial behavior that diverge from the assumptions of existing models and shows how those models can be strengthened
