Crash The Body In Crisis Body Story:

Crash Elaine Pascoe, 2004 Go deep inside the body to see what happens when organs are injured See how ruptured arteries put deadly pressure on the brain and understand the impact of interrupted brain function throughout the body Then witness as the brain repairs itself and slowly regains the vital connections it had lost **Nuclear Threats, Nuclear Fear**

and the Cold War of the 1980s Eckart Conze, Martin Klimke, Jeremy Varon, 2017 The book brings together cutting edge scholarship from the United States and Europe to address political and cultural responses to the arms race of the 1980s

School Library Journal, 2004 **Racialized Bodies, Disabling Worlds** Parin Dossa, 2009-01-01 In *Racialized Bodies Disabling Worlds* Parin Dossa explores the lives of Canadian Muslim women who share their stories of social marginalization and disenfranchisement in a disabling world She shows how these women who are subjected to social erasure in policy and research define their identities and claim their humanity using the language of everyday life Based on narrative ethnography *Racialized Bodies Disabling Worlds* makes a case for positive acknowledgement of perceived differences of nationality religion multiple abilities and gendered and race based identities It offers a powerful argument for bridging two disparate bodies of work disability studies and anti racist feminism Most significantly it shows how racialized Muslim women with disabilities are redefining the parameters of their social worlds and developing a distinctively pluralistic understanding of abilities This ground breaking work gives presence to the lives of people who are otherwise rendered socially invisible

Tattooed Bodies James Martell, Erik Larsen, 2022-01-20 The essays collected in *Tattooed Bodies* draw on a range of theoretical paradigms and empirical knowledge to investigate tattoos tattooing and our complex relations with marks on skin Engaging with diverse disciplinary perspectives in art history continental philosophy media studies psychoanalysis critical theory literary studies biopolitics and cultural anthropology the volume reflects the sheer diversity of meanings attributed to tattoos throughout history and across cultures Essays explore conceptualizations of tattoos and tattooing in Derrida Deleuze and Guattari Lacan Agamben and Jean Luc Nancy while utilizing theoretical perspectives to interpret tattoos in literary works by Melville Beckett Kafka Genet and Jeff VanderMeer among others *Tattooed Bodies* prompts readers to explore a few significant questions Are tattoos unique phenomena or an art medium in need of special theoretical exploration If so what conceptual paradigms and theories might best shape our understanding of tattoos and their complex ubiquity in world cultures and histories

Best Books for Children, Preschool Through Grade 6, 2006 **Bodies of Tomorrow** Sherryl Vint, 2007-01-01 *Bodies of Tomorrow* argues for the importance of challenging visions of humanity in the future that overlook our responsibility as embodied beings connected to a material world **Radiation Nation** Natasha Zaretsky, 2018-02-13 On March 28 1979 the worst nuclear reactor accident in U S history occurred at the Three Mile Island power plant in Central Pennsylvania *Radiation Nation* tells the story of what happened that day and in the months and years that followed as local residents tried to make sense of the emergency The near meltdown occurred at a pivotal moment when the New Deal

coalition was unraveling trust in government was eroding conservatives were consolidating their power and the political left was becoming marginalized Using the accident to explore this turning point Natasha Zaretsky provides a fresh interpretation of the era by disclosing how atomic and ecological imaginaries shaped the conservative ascendancy Drawing on the testimony of the men and women who lived in the shadow of the reactor Radiation Nation shows that the region's citizens especially its mothers grew convinced that they had sustained radiological injuries that threatened their reproductive futures Taking inspiration from the antiwar environmental and feminist movements women at Three Mile Island crafted a homegrown ecological politics that wove together concerns over radiological threats to the body the struggle over abortion and reproductive rights and eroding trust in authority This politics was shaped above all by what Zaretsky calls biotic nationalism a new body centered nationalism that imagined the nation as a living mortal being and portrayed sickened Americans as evidence of betrayal The first cultural history of the accident Radiation Nation reveals the surprising ecological dimensions of post Vietnam conservatism while showing how growing anxieties surrounding bodily illness infused the political realignment of the 1970s in ways that blurred any easy distinction between left and right **Revolutionary Bodies**
