Contemporary Perspectives on Early Childhood Curriculum Olivia Saracho,Bernard Spodek,2002-06-01 Over the years educational scholars have proposed different conceptions of the curriculum It is as if each scholar researcher university educator and practitioner has developed her or his own personal definition Unfortunately there is no one single definition that everybody has agreed upon Table 1 presents a sample of these definitions A universal definition for curriculum may continue to be elusive and may even change through the years to address changes in the social forces and changes in related school goals Nonetheless the approach in curriculum development is consistent Curriculum developers establish goals develop experiences designate content and evaluate experiences and outcomes Most curriculum developers consistently use such terms as curriculum planning curriculum development curriculum implementation and curriculum evaluation and many others to describe curriculum related activities Unfortunately without a consistent definition of curriculum it is difficult for the curriculum developers to identify what it is that needs to be planned developed implemented

or evaluated If curriculum developers rely on the curriculum experts definitions they will find that their definitions identify a product a program determine goals and objectives and learner experiences However its heterogeneity may be inspiring if curriculum developers rely on the components of each definition that depict the richness of the field which in turn can provide a foundation for contemporary content concepts and creativity A curriculum is an anthology of learning experiences conceived and arranged based on a program s educational goals and the community s social forces Each curriculum manifests an image of what children ought to be and become Biber 1984 p 303 grounded on the awareness of social values and a system that interprets those values into experiences for learners The concept of curriculum as a distinctive domain of study within education arose from the demand to arrange organize and translate such awareness into educational programs of study It integrates the historical study of the goals and content of schooling analyses of curriculum documents and analyses of the children s experiences in school The first formal curriculum text was published in 1918 Bobbit 1918 although in the United States contemporary curriculum study goes back to the early 1890 s when lead committees challenged the form and structure of public schooling Presently curriculum development is fundamental at all educational levels **From**
