Creating Modern Capitalism Thomas K. McCraw, 1997 This is the first book to explain for a broad audience the interconnections among technological innovation management science the power of entrepreneurship and national economic growth in countries like Britain Japan and the United States

McCraw, 1998-01-02 What explains the economic success of the U S Britain Germany and Japan What can be learned from the performances of leading business firms How important were specific innovations by individual entrepreneurs What is the nature of capitalist development McCraw and his coauthors present penetrating answers to these questions

The Making of Global Capitalism Leo Panitch, Sam Gindin, 2013-10-08 The all encompassing embrace of world capitalism at the beginning of the twenty first century was generally attributed to the superiority of competitive markets Globalization had appeared to be the natural outcome of this unstoppable process But today with global markets roiling and increasingly reliant on state intervention to stay afloat it has become clear that markets and states aren't straightforwardly opposing forces In this groundbreaking work Leo Panitch and Sam Gindin demonstrate the intimate relationship between modern capitalism and the American state The Making of Global Capitalism identifies the centrality of the social conflicts that occur within states rather than between them These emerging fault lines hold out the possibility of new political movements that might transcend global markets

Creating Capitalism Patricia Dillon, Frank C. Wykoff, 2002-01-01 The authors examine the progress of six countries Bulgaria Czech Republic Estonia Hungary Russia and Slovakia in terms of each country's history and its successful application of the five reforms Anyone interested in how capitalism works and why pro market reforms encounter resistance in spite of their potential for generating higher living standards will find this book essential reading

BOOK JACKET *Werner Sombart and the 'Spirit' of Modern Capitalism* Christopher Adair-Totter, 2024-03-18 This book illuminates the work of Werner Sombart a key contemporary of Max Weber showing how his writing and thinking laid the groundwork for concepts of modern capitalism Although the notion of the spirit of modern capitalism is most associated with Weber it was Sombart who first used this phrase with Weber focusing mainly on socioeconomics while Sombart continued to develop his ideas around modern capitalism This book critically analyses Sombart's groundbreaking work *Der moderne Kapitalismus* among his other writings to demonstrate how they may be read as a complementary alternative to Weber providing a more detailed sustained and a comprehensive account of the genesis and nature of modern capitalism This book will be of interest to a scholarly audience including students and researchers of the history of economic thought as well as areas of sociology politics and political economy

[The Rise of Multicultural America](#) Susan L. Mizruchi, 2009-06-01 Between the Civil War and World War I the United States underwent the most rapid economic expansion in history At the same time the country experienced unparalleled rates of

immigration In *The Rise of Multicultural America* Susan Mizruchi examines the convergence of these two extraordinary developments No issue was more salient in postbellum American capitalist society she argues than the country's bewilderingly diverse population This era marked the emergence of Americans self consciousness about what we today call multiculturalism Mizruchi approaches this complex development from the perspective of print culture demonstrating how both popular and elite writers played pivotal roles in articulating the stakes of this national metamorphosis In a period of widespread literacy writers assumed a remarkable cultural authority as best selling works of literature and periodicals reached vast readerships and immigrants could find newspapers and magazines in their native languages Mizruchi also looks at the work of journalists photographers social reformers intellectuals and advertisers Identifying the years between 1865 and 1915 as the founding era of American multiculturalism Mizruchi provides a historical context that has been overlooked in contemporary debates about race ethnicity immigration and the dynamics of modern capitalist society Her analysis recuperates a legacy with the potential to both invigorate current battle lines and highlight points of reconciliation
