Eyes on the Workplace National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Committee on Vision, 1988-01-01 About 25 million Americans are 65 and older That figure will double during the next 25 years Over the next 15 years the baby boom generation will swell the ranks of middle aged workers But the numbers tell only half the story The gradual decline in visual functioning that usually accompanies aging often goes undetected or is deemed untreatable Older people may have difficulty seeing at night reading small print distinguishing similar colors or coping with glare from a desktop or video display terminal This report is the summary of a Conference held to identify and describe major research findings related to changing visual capacities and the employment of older workers to recommend steps that could be taken by businesses to encourage the continued productive employment of older workers and to identify research topics that have yet to be explored that might bear on this subject

Performance Assessment for the Workplace National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Committee on the Performance of Military Personnel, 1991-01-01 Although ability testing has been an American preoccupation since the 1920s comparatively little systematic attention has been paid to understanding and measuring the kinds of human performance that tests are commonly used to predict such as success at school or work Now a sustained large scale effort has been made to develop measures that are very close to actual performance on the job The four military services have carried out an ambitious study called the Joint Service Job Performance Measurement Enlistment Standards JPM Project that brings new sophistication to the measurement of performance in work settings Volume 1 analyzes the JPM experience in the

context of human resource management policy in the military Beginning with a historical overview of the criterion problem it looks closely at substantive and methodological issues in criterion research suggested by the project the development of performance measures sampling logistical and standardization problems evaluating the reliability and content representativeness of performance measures and the relationship between predictor scores and performance measures valuable information that can also be useful in the civilian workplace *Women, Work, and Wages* National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Committee on Occupational Classification and Analysis, 1981-02-01 In order to determine whether methods of job analysis and classification currently used are biased by traditional sex stereotypes or other factors a committee assessed formal systems of job evaluation and other methods currently employed in the private and public sectors for establishing the comparability of jobs and their levels of compensation A review of sociological and economic literature shows that some differences in the characteristics of workers and in jobs do form a legitimate basis for wage differentials Nevertheless there exists a pervasiveness of occupational and job segregation by sex Given the current operation of the labor market and the existence of a variety of factors that permit the persistence of earning differentials between men and women e g labor market segmentation job segregation and employment practices it would seem that intentional and unintentional discriminatory elements enter into the determination of wages and are not likely to disappear Use of a job evaluation system is one possible remedy to this situation While the subjectivity of job evaluation makes job evaluations less than perfect vehicles for resolving pay disputes they can serve to identify potential wage discrimination MN **Measuring the Science and Engineering Enterprise** National Research Council, Committee on National Statistics, Office of Scientific and Engineering Personnel, Committee to Assess the Portfolio of The Division of Science Resources Studies of NSF, 2000-02-14 The science and engineering enterprise has continued to evolve responding over the last decade to increased economic globalization a post cold war military federal budget fluctuations and structural changes in the way science and engineering are conducted and innovations are adopted This report suggests ways to revise the data collection activities of the Science Resources Studies Division SRS of the National Science Foundation to better capture the current realities of R D funding and S E human resources The report s recommendations would improve the relevance of the data on graduate education the labor market for scientists and engineers and the funding and conduct of research and development and thus better meet the data needs of policymakers managers and researchers **Meeting the Nation's Needs for Biomedical and Behavioral Scientists** National Research Council, Policy and Global Affairs, Office of Scientific and Engineering Personnel, Committee on National Needs for Biomedical and Behavioral Research Personnel, 1994-02-01 This book assesses the nation s future needs for biomedical and behavioral scientists and the role the National Research Service Awards NRSA program can play in meeting those needs The year 1994 marks the twentieth anniversary of the National Research Act of 1974 PL 93 348 which

established the NRSA program In its twenty years of operation the NRSA program has made it possible for many thousands of talented individuals in the basic biomedical behavioral and clinical sciences to sharpen their research skills and to apply those skills to topics of special concern to the nation such as aging hypertension the genetic basis of disease acquired immune deficiency syndrome AIDS cancer environmental toxicology nutrition and health and substance abuse

Performance Assessment for the Workplace, Volume II National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Committee on the Performance of Military Personnel, 1991-02-01 Volume II covers a number of measurement and analytical issues in greater technical detail including range restriction adjustments methods for evaluating multiple sources of error in measurement comparing alternative measures of performance and strategies for clustering military occupations *Work-Related Musculoskeletal Disorders* National Research Council, Division of Behavioral and Social Sciences and Education, Board on Human-Systems Integration, Steering Committee for the Workshop on Work-Related Musculoskeletal Injuries: The Research Base, 1999-04-11 Estimated costs associated with lost days and compensation claims related to musculoskeletal disorders including back pains and repetitive motion injuries range from 13 billion to 20 billion annually This is a serious national problem that has spurred considerable debate about the causal links between such disorders and risk factors in the workplace This book presents a preliminary assessment of what is known about the relationship between musculoskeletal disorders and what may cause them It includes papers and a workshop summary of findings from orthopedic surgery public health occupational medicine epidemiology risk analysis ergonomics and human factors Topics covered include the biological responses of tissues to stress the biomechanics of work stressors the epidemiology of physical work factors and the contributions of individual recreational and social factors to such disorders The book also considers the relative success of various workplace interventions for prevention and rehabilitation Work-Related Musculoskeletal Disorders Steering Committee for the Workshop on Work-Related Musculoskeletal Injuries: The Research Base, Board on Human-Systems Integration, Division of Behavioral and Social Sciences and Education, National Research Council, 1999-03-25 Estimated costs associated with lost days and compensation claims related to musculoskeletal disorders including back pains and repetitive motion injuries range from 13 billion to 20 billion annually This is a serious national problem that has spurred considerable debate about the causal links between such disorders and risk factors in the workplace This book presents a preliminary assessment of what is known about the relationship between musculoskeletal disorders and what may cause them It includes papers and a workshop summary of findings from orthopedic surgery public health occupational medicine epidemiology risk analysis ergonomics and human factors Topics covered include the biological responses of tissues to stress the biomechanics of work stressors the epidemiology of physical work factors and the contributions of individual recreational and social factors to such disorders The book also considers the relative success of various workplace interventions for prevention and rehabilitation Sex

Segregation in the Workplace National Research Council, Commission on Behavioral and Social Sciences and Education, Committee on Women's Employment and Related Social Issues, 1984-01-01 How pervasive is sex segregation in the workplace Does the concentration of women into a few professions reflect their personal preferences the tastes of employers or sex role socialization Will greater enforcement of federal antidiscrimination laws reduce segregation What are the prospects for the decade ahead These are among the important policy and research questions raised in this comprehensive volume of interest to policymakers researchers personnel directors union leaders anyone concerned about the economic parity of women *Research Recommendations to Facilitate Distributed Work* National Research Council, Computer Science and Telecommunications Board, Technology and Telecommunications: Issues and Impacts Committee, 1994-02-01 This book sets out technological research topics designed to facilitate and expand distributed work including telecommuting working while mobile and working in geographically distributed teams The book's recommendations for computing and communications infrastructure center on the provision and use of bandwidth or the speed of communications Concurrent applications research should be focused on ease of use and interoperability of the multitude of devices and programs that currently are needed to engage in distributed work
