Feminisms and Womanisms Althea Prince,Susan Silva-Wayne,2004 Feminisms and Womanisms brings together theory and practical application so that feminist discourse interacts as a partner with the lived experience of women s social action The selections combine classics in feminist thought with work from modern theorists and offer a solid foundation in international feminism The conceptual understanding embedded in the terms feminism and womanism contributes to feminist discourse a carefully differentiated focus on the ideological uses of language to define relationships that have been historically mired in domination The terms also define the way gender often has been used to signify and support domination

Given that feminism and womanism are interpretive concepts there is always a sense that knowledge making is in progress for there is nothing static or stagnant about feminism feminist theory and feminist action The formative nature of the feminist movement has of necessity a parallel interpretive theory This reader embraces both the formative nature of the movement and the accompanying interpretive theories It also pays attention to the chronological cultural geopolitical racial and ethnic landscapes and sites where women live carry out social action and theorize issues of equality For both the general and academic reader this book will be edifying while providing exposure to the feminist womanist voices that inform the scholarship

Neuropedia | The Deblocking Method Paulo Sergio Santos Negrete, aka, "Teacher John Chapman", 2021-03-09 Welcome to Neuropedia The Deblocking Method This method accelerates learning 3 to 5 times more than any conventional method It has several positive by products such as psychotherapeutic and psycho hygienic effects in the Suggestopedic environment created in the classroom During my years of teaching English as a Foreign Language I could never accept the fact that my students needed so many years to start speaking a new language with confidence Some others even with years of study and dedication could not develop despite my efforts to create better classes and activities Others had to constantly review the verb to be The results The students were afraid of speaking and learning Many people may ask But how can it be possible to learn effectively in a short time What s the secret Others say That s impossible It is just propaganda But actually we are beings with an incredible power to learn but the Social Suggestive Norms so present in our pedagogical system for centuries dictate how much we can learn and how long we need to But I ask you How did we learn our mother language How could our brain collect organize understand and reproduce words and sentences when we were children No one went to school to learn to speak Our parents or who may have raised us never taught us grammar in order to make us speak We can realize that we are missing something in our system of foreign language teaching It does not use the resources available in our brain mind Our way of teaching in the present is not structured to follow the way the brain receives stores and processes information So why not change the whole system The answer is quite simple Who wants to train teachers Change textbooks and methods How long would it take But the fact is that more scientists are discovering the mysteries of mind and memory We are taking advantage of these discoveries made centuries and decades ago Researchers have noticed that the current pedagogic system is not the best approach to learn That s why so many so called accelerated learning systems or brain friendly approaches have appeared The main problem is that most of them have never been really tested They have not had a follow up for decades to check if they would be beneficial to the students Neuropedia is a method with a scientific background
