Alexandr Vesnin and Russian Constructivism Selim Omarovich Khan-Magomedov,1986 Alexander Vesnin and Russian Constructivism Selim Omarovich Khan-Magomedov,1986 The Unsung Hero of the Russian Avant-Garde Natalia Murray,2012-06-27 The first biography of Nikolay Punin this book offers a comprehensive analysis of his life in the context of Russian political social and cultural history in the first half of the XX century **Vesnin, Alexander, and Russian Constructivism** T. Khan-Magomedov,1990-01-01 *Factory and Community in Stalin's Russia* Kenneth M. Straus,2010-11-23 Kenneth Straus weaves together many threads in Russian social history to develop a new theory of working class formation in the years of Stalin's First Five Year Plan In so doing he addresses a long standing debate among historians by suggesting new answers to an old question Was there social support for the Stalin regime among the Soviet working class during the 1930s and if so why Straus argues that the keys for interpreting Stalinism lie in occupational specialization on the one hand and community organization on the other He focuses on the daily life of the new Soviet workers in the factory and community arguing that the most significant new trends saw peasants becoming open hearth steel workers housewives becoming auto assembly line workers and machine operatives and youth training en masse rather than occupations categories in the vocational schools in the factories the FZU Tapping archival material only recently available and a wealth of published sources Straus presents Soviet social history within a new analytical framework suggesting that Stalinist forced industrialization and Soviet proletarianization is best understood within a comparative European framework in which the theories of Marx Durkheim and Weber best elucidate both the broad similarities with Western trends and the striking exceptional aspects of the Soviet experience **Constructing Modernity** Martin Hammer,Professor Christina Lodder,Naum Gabo,Christina Lodder,2000-01-01 Naum Gabo 1890 1977 whose eventful life took him from his native Russia to Berlin Paris London and finally the United States achieved renown as one of the most inventive and controversial figures in twentieth century sculpture This book is the first comprehensive account of Gabo's life career and artistic theory and practice Martin Hammer and Christina Lodder explore in detail the evolution of the artist's work and his aesthetic concerns creative processes assimilation of such new materials as plastic and approach to public sculpture The authors also examine his response to the scientific and political revolutions of his age and trace the origins and development of Gabo's utopian conviction that Constructivist art was profoundly in tune with modernity social progress and advances in science and technology Drawing on Gabo's extensive and largely unpublished archives of letters diaries notebooks models and sketchbooks Hammer and Lodder discuss the sculptor's work in the context of his relations with other avant garde artists architects and critics including his brother Antoine Pevsner They also situate his aesthetic theory and practice within the Constructi *Makers of 20th-Century Modern Architecture* Donald Leslie Johnson,Donald Langmead,2013-05-13 *Makers of 20th Century Modern Architecture* is an indispensable reference book for the scholar student architect or layman interested

in the architects who initiated developed or advanced modern architecture The book is amply illustrated and features the most prominent and influential people in 20th century modernist architecture including Wright Eisenman Mies van der Rohe and Kahn It describes the milieu in which they practiced their art and directs readers to information on the life and creative activities of these founding architects and their disciples The profiles of individual architects include critical analysis of their major buildings and projects Each profile is completed by a comprehensive bibliography

Sculpture and the Vitrine JohnC. Welchman,2017-07-05 Vitrines and glass cabinets are familiar apparatuses that have in large part defined modern modes of display and visibility both within and beyond the museum They separate objects from their contexts group them with other objects both similar and dissimilar and often serve to reinforce their intrinsic or aesthetic values The vitrine has much in common with the picture frame the plinth and the gallery but it has not yet received the kind of detailed art historical and theoretical discussion that has been brought to these other modes of formal display The twelve contributions to this volume examine some of the points of origin of the vitrine and the various relations it brokers with sculpture first in the Wunderkammer and cabinet of curiosities and then in dialog with the development of glazed architecture beginning with Paxton s Crystal Palace 1851 The collection offers close discussions of the role of the vitrine and shop window in the rise of commodity culture and their apposition with Constructivist design in the work of Frederick Kiesler as well as original readings of the use of vitrines in Surrealism and Fluxus and in work by Joseph Beuys Paul Thek Claes Oldenburg and his collaborators Jeff Koons Mike Kelley Dan Graham Vito Acconci Damien Hirst and Josephine Meckseper among others *Sculpture and the Vitrine* also raises key questions about the nature and implications of vitrinous space including its fronts onto desire and the spectacle transparency and legibility and onto ideas and practices associated with the archive collecting preserving and ordering

Russian Architecture and the West Dmitriï Olegovich Shvidkovskiï,Shvidkovsky,2007-01-01 This is the first book to show the development of Russian architecture over the past thousand years as a part of the history of Western architecture Dmitry Shvidkovsky Russia s leading architectural historian departs from the accepted notion that Russian architecture developed independent of outside cultural influences and demonstrates that to the contrary the influence of the West extends back to the tenth century and continues into the present He offers compelling assessments of all the main masterpieces of Russian architecture and frames a radically new architectural history for Russia The book systematically analyzes Russian buildings in relation to developments in European art pointing out where familiar European features are expressed in Russian projects Special attention is directed toward decorations based on Byzantine models the heritage of Italian master builders and carvers the impact of architects and others sent by Elizabeth I the formation of the Russian Imperial Baroque the Enlightenment in Russian art and 19th and 20th century European influences With over 300 specially commissioned photographs of sites throughout Russia and western Europe this magnificent book is both beautiful and groundbreaking

The Architect ,1987 *Soviet Architectural Avant-Gardes* Danilo

Udovicki-Selb,2022-01-13 Conventional readings of the history of Soviet art and architecture show modernist utopian aspirations as all but prohibited by 1932 under Stalin's totalitarianism Soviet Architectural Avant Gardes challenges that view Radically redefining the historiography of the period it reveals how the relationship between the Party and practicing architects was much more complex and contradictory than previously believed and shows in contrast to the conventional scholarly narrative how the architectural avant garde was able to persist at a time when it is widely considered to have been driven underground In doing so this book provides an essential perspective on how to analyse evaluate and re imagine the history of modernist expression in its cultural context It offers a new understanding of ways in which 20th century social revolutions and their totalitarian sequels inflected the discourse of both modernity and modernism The book relies on close analyses of archival documents and architectural works Many of the documents have been rarely if ever discussed in English before while the architectural projects include iconic works such as the Palace of Soviets and the Soviet Pavilion at the Paris 1937 World Exposition as well as remarkable works that until now have been neglected by architectural historians inside and outside Russia In a fascinating final chapter it also reveals for the first time the details of Frank Lloyd Wright's triumphant welcome at the First Congress of Soviet Architects in Moscow in 1937 at the height of Stalin's Terror Publisher's description

Architectures of Russian Identity, 1500 to the Present James Cracraft, Daniel B. Rowland, 2018-08-06 From the royal pew of Ivan the Terrible to Catherine the Great's use of landscape to the struggles between the Orthodox Church and preservationists in post Soviet Yaroslavl across five centuries of Russian history Russian leaders have used architecture to project unity identity and power Church architecture has inspired national cohesion and justified political control while representing the claims of religion in brick wood and stone The architectural vocabulary of the Soviet state celebrated industrialization mechanization and communal life Buildings and landscapes have expressed utopian urges as well as lofty spiritual goals Country houses and memorials have encoded their own messages In *Architectures of Russian Identity* James Cracraft and Daniel Rowland gather a group of authors from a wide variety of backgrounds including history and architectural history linguistics literary studies geography and political science to survey the political and symbolic meanings of many different kinds of structures Fourteen heavily illustrated chapters demonstrate the remarkable fertility of the theme of architecture broadly defined for a range of fields dealing with Russia and its surrounding territories The authors engage key terms in contemporary historiography identity nationality visual culture and assess the applications of each in Russian contexts

Elastic Architecture Stephen J. Phillips, 2017-04-07 Twentieth century architect Frederick Kiesler's innovative multidisciplinary practice responded to the ever changing needs of the body in motion anticipating the research oriented practices of contemporary art and architecture In 1960 the renowned architect Philip Johnson championed Frederick Kiesler calling him the greatest non building architect of our time Kiesler's ideas were difficult to construct but as Johnson believed enormous and profound Kiesler 1890-1965 went against the grain of the accepted modern style rejecting rectilinear glass

and steel in favor of more organic forms and flexible structures that could respond to the ever changing needs of the body in motion In *Elastic Architecture* Stephen Phillips offers the first in depth exploration of Kiesler s innovative and multidisciplinary research and design practice Phillips argues that Kiesler established a new career trajectory for architects not as master builders but as research practitioners whose innovative means and methods could advance alternative and speculative architecture Indeed Kiesler s own career was the ultimate uncompromising model of a research based practice Exploring Kiesler s formative relationships with the European avant garde Phillips shows how Kiesler found inspiration in the plastic arts experimental theater early animation and automatons to develop and refine his spatial concept of the Endless Moving from Europe to New York in the 1920s Kiesler applied these radical Dadaist constructivist and surrealist practices to his urban display projects which included shop windows for Saks Fifth Avenue After launching his innovative Design Correlation Laboratory at Columbia and Yale Kiesler went on to invent new houses theaters and galleries that were meant to move shift and adapt to evolutionary changes occurring within the natural and built environment As Phillips demonstrates vividly although many of Kiesler s designs remained unbuilt his ideas proved influential to later generations of architects and speculative artists internationally including Archigram Greg Lynn UNStudio and Olafur Eliasson

Handbook of International Futurism Günter Berghaus, 2018-12-17 The *Handbook of International Futurism* is the first reference work ever to presents in a comparative fashion all media and countries in which the movement initiated by F T Marinetti in 1909 exercised a particularly noteworthy influence The handbook offers a synthesis of the state of scholarship regarding the international radiation of Futurism and its influence in some fifteen artistic disciplines and thirty eight countries While acknowledging the great achievements of the movement in the visual and literary arts of Italy and Russia it treats Futurism as an international multidisciplinary phenomenon that left a lasting mark on the manifold artistic manifestations of the early twentieth century avant garde Hundreds of artists who in some phase in their career absorbed Futurist ideas and stylistic devices are presented in the context of their national traditions their international connections and the media in which they were predominantly active The handbook acts as a kind of multi disciplinary geographical encyclopaedia of Futurism and gives scholars with varying levels of experience a detailed overview of all countries and disciplines in which the movement had a major impact

Event-Space Dorita Hannah, 2018-07-11 As the symbolists constructivists and surrealists of the historical avant garde began to abandon traditional theatre spaces and embrace the more contingent locations of the theatrical and political event the built environment of a performance became not only part of the event but an event in and of itself Event Space radically re evaluates the avant garde s championing of nonrepresentational spaces drawing on the specific fields of performance studies and architectural studies to establish a theory of performative architecture Event was of immense significance to modernism s revolutionary agenda resisting realism and naturalism and simultaneously the monumentality of architecture itself Event Space analyzes a number of spatiotemporal models central to that revolution both

illuminating the history of avant garde performance and inspiring contemporary approaches to performance space
