*Charles Olson and Alfred North Whitehead* Shachar Bram,2004 Annotation Through a detailed and thoughtful study of the impact of Alfred North Whitehead s philosophy on Olson s aesthetic theory this book points out the conceptual unity underlying what seems to be a sprawl of fragments in Olson s major work The Maximus Poems On the one hand concrete poetic units of The Maximus Poems serve as a starting point for clarifying how different elements are joined together in one unity On the other hand the book traces the blending of the whole poem at the macro level following its course through a temporal progress in which the poem moves from one poetic unit to the next that is from a unity of multiplicity to a new unity in which the previous unity is already part of the multiplicity building the new one Thus the book illuminates Olson s theory of the Long Poem as an all containing corpus governed by metaphysical principles equal to life itself enacted in the process of working on The Maximus Poems BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved      *Alfred North Whitehead: book II* Alfred North Whitehead,Filmer Stuart Cuckow Northrop,1953 First published in 1953 this is a collection of selected works by the mathematician and philosopher Alfred North Whitehead 1861 1947

**The Wit and Wisdom of Alfred North Whitehead** Alfred North Whitehead,1947 Presents a directory of online resources related to semiotics Provides access to essays and glossaries and calls for papers Offers access to research groups conference proceedings and periodicals Links to other directories and to a French version of the site      **Process and Reality** Alfred North Whitehead,1960 This book one of Alfred North Whitehead s most important works presents a condensed scheme of cosmological ideas developed by confrontation with various types of experience Thus this design attempts to bring the aesthetic moral and religious interests into relation with those elements of knowledge which have their origin in natural science Professor Whitehead himself said In putting out these results four strong impressions dominate my mind First that the movement of historical and philosophical criticism of detached questions which on the whole had dominated the last two centuries has done its work and requires to be supplemented by a more sustained effort of constructive thought Secondly that the true method of philosophical construction is to frame a scheme of ideas the best one can and unflinchingly to explore the interpretations of experience in terms of that scheme Thirdly that all constructive thought on the various special topics of scientific interest is dominated by some such scheme unacknowledged but no less

influential in guiding the imagination The importance of philosophy lies in the sustained effort to make such schemes explicit and thereby capable of criticism and improvement Publisher      **Aims of Education** Alfred North Whitehead, 1967 Presents the texts of a series of lectures delivered between 1912 and 1928 on the purposes and practice of education
