Morphometrics Ashraf M.T. Elewa, 2013-03-09 Morphometrics is one of the most dynamic and popular fields on the contemporary biological scene Focusing as it does on the quantitative characterization and analysis of morphological data students increasingly see morphometrics as a necessary complement to molecular studies in their quests to understand the origin and maintenance of biodiversity Moreover morphometrics has recently been shown to have direct utility in phylogenetic contexts by both finding new and sharpening the definition of old character states At this juncture in the field s development a more up to date and thorough treatment of the use of morphometric procedures in a wide variety of contexts is needed The book in hand Morphometrics provides such answers to real world questions for real world systematists

González-Pech, 2023-12-18      **Antarctic Seaweeds** Iván Gómez, Pirjo Huovinen, 2020-04-29 Seaweeds macroalgae represent the most striking living components in the Antarctic s near shore ecosystems especially across the West Antarctic Peninsula and adjacent islands Due to their abundance their central roles as primary producers and foundation organisms and as sources of diverse metabolically active products seaweed assemblages are fundamental to biogeochemical cycles in Antarctic coastal systems In recent years the imminence of climate change and the direct impacts of human beings which are affecting vast regions of the Antarctic have highlighted the importance of seaweed processes in connection with biodiversity adaptation and interactions in the benthic network Various research groups have been actively involved in the investigation of these topics Many of these research efforts have a long tradition while some newcomers have also recently contributed important new approaches to the study of these organisms benefiting polar science as a whole This book provides an overview of recent advances and insights gleaned over the past several years Focusing on a timely topic and extremely valuable resource it assesses the challenges and outlines future directions in the study of Antarctic seaweeds

**Sponges (Porifera)** Werner E. G. Müller, 2012-12-06 Sponges phylum Porifera are known to be very rich sources for bioactive compounds mainly secondary metabolites Main efforts are devoted to cell and mariculture of sponges to assure a sustainable exploitation of bioactive compounds from biological starting material These activities are flanked by improved technologies to cultivate bacteria and fungi which are associated with the sponges It is the hope that by elucidating the

strategies of interaction between microorganisms and their host sponge by modern cell and molecular biological methods a more comprehensive cultivation of the symbiotic organisms will be possible The next step in the transfer of knowledge to biotechnological applications is the isolation characterization and structural determination of the bioactive compounds by sophisticated chemical approaches

Gorbachev, 2003-08-03 Some of the most challenging problems in science and engineering are being addressed by the integration of computation and science a research field known as computational science Computational science plays a vital role in fundamental advances in biology physics chemistry astronomy and a host of other disciplines This is through the coordination of computation data management access to instrumentation knowledge

synthesis and the use of new devices It has an impact on researchers and practitioners in the sciences and beyond The sheer size of many challenges in computational science dictates the use of supercomputing parallel and distributed processing grid based processing advanced visualization and sophisticated algorithms At the dawn of the 21st century the series of International Conferences on Computational Science ICCS was initiated with a first meeting in May 2001 in San Francisco The success of that meeting motivated the organization of the second meeting held in Amsterdam April 21-24 2002 where over 500 participants pushed the research field further The International Conference on Computational Science 2003 ICCS 2003 is the follow up to these earlier conferences ICCS 2003 is unique in that it was a single event held at two different sites almost opposite each other on the globe Melbourne Australia and St Petersburg Russian Federation The conference ran on the same dates at both locations and all the presented work was published in a single set of proceedings which you hold in your hands right now

**Simulating Complex Systems by Cellular Automata** Alfons G. Hoekstra, Jiri Kroc, Peter M.A. Slood, 2010-06-03 Deeply rooted in fundamental research in Mathematics and Computer Science Cellular Automata CA are recognized as an intuitive modeling paradigm for Complex Systems Already very basic CA with extremely simple micro dynamics such as the Game of Life show an almost endless display of complex emergent behavior Conversely CA can also be designed to produce a desired emergent behavior using either theoretical methodologies or evolutionary techniques Meanwhile beyond the original realm of applications Physics Computer Science and Mathematics CA have also become work horses in very different disciplines such as epidemiology immunology sociology and finance In this context of fast and impressive progress spurred further by the enormous attraction these topics have on students this book emerges as a welcome overview of the field for its practitioners as well as a good starting point for detailed study on the graduate and post graduate level The book contains three parts two major parts on theory and applications and a smaller part on software The theory part contains fundamental chapters on how to design and or apply CA

for many different areas In the applications part a number of representative examples of really using CA in a broad range of disciplines is provided this part will give the reader a good idea of the real strength of this kind of modeling as well as the incentive to apply CA in their own field of study Finally we included a smaller section on software to highlight the important work that has been done to create high quality problem solving environments that allow to quickly and relatively easily implement a CA model and run simulations both on the desktop and if needed on High Performance Computing infrastructures
