*Jurisprudence of International Criminal Justice* Farhad Malekian,2014-06-30 Introduction written by Professor Benjamin B Ferencz This challenging volume examines the jurisprudence of international criminal justice from various points of view The philosophy of justice may vary from time to time and from nation to nation depending on prevailing attitudes towards the substantive rules which deal in one way or another with cultural norms In the national and international area the principles of criminal justice have a key role in examining the scope of the most serious violations of international criminal law It is on the basis of appropriate judgment that these principles may be accumulated and achieved for the future conduct of man This volume therefore examines the principles and dimensions of the constitutions of various international criminal tribunals courts with particular focus on the Statute of the International Criminal Court ICC As such the volume offers a comprehensive evaluation of the rule of law and criminal justice and their legal tasks within the complementarity system of international criminal jurisprudence The volume emphasises the prosecution and punishment of all those who may successfully escape from the proceedings of national and international criminal courts because of their juridical political

religious economic or military power It demands the implementation of international law of jus cogens The provisions of the Statute should not be deduced in contradiction to the norms from which no derogation is possible such as prohibitions governing crimes against humanity torture apartheid rape war crimes genocide and aggression If the value of the task of the Court is to be realised by the majority of states in the international community the cycle of impunity has to be abolished in the case of all states including the five permanent members of the Security Council of the United Nations **Assembly Bills, Original and Amended** California. Legislature. Assembly,1961 Couldn't Cheat Death Felice Stevens,A.P.
