The Afterlife of the Platonic Soul Maha Elkaisy-Friemuth, John Myles Dillon, 2009 Plato's doctrine of the soul its immaterial nature its parts or faculties and its fate after death and before birth came to have an enormous influence on the great religious traditions that sprang up in late antiquity beginning with Judaism in the person of Philo of Alexandria and continuing with Christianity from St Paul on through the Alexandrian and Cappadocian Fathers to Byzantium and finally with Islamic thinkers from Al kindi on This volume while not aspiring to completeness attempts to provide insights into how members of each of these traditions adapted Platonist doctrines to their own particular needs with varying degrees of creativity

REAL - Yearbook of Research in English and American Literature, Volume 38 Laura Bieger, Johannes Völz, 2024-04-29 Celebrating the 80th birthday of Winfried Fluck this volume of REAL gathers leading US American and European literary scholars from English and American Studies to engage some of his classic essays covering topics that range from the aesthetics of early American literature to the history of our digital present and from the Americanization of literary studies to the search for American democratic culture Each of the volume's twelve dialogues consists of a republished essay by Fluck and a response by one of his interlocutors written specifically for this occasion Contributors include field defining scholars long time companions and colleagues whose intellectual trajectory has been impacted by Fluck's incisive metacriticism and his reception oriented approach to literary and cultural history The twelve dialogues reassess debates that have shaped literary studies in the late twentieth century and they inquire into the paradigmatic shifts that are currently reorganizing the field

Francis Halsall, Julia Jansen, Sinéad Murphy, 2011-11-17 *Critical Communities and Aesthetic Practices* brings together eminent international philosophers to discuss the inter dependence of critical communities and aesthetic practices Their contributions share a hermeneutical commitment to dialogue both as a model for critique and as a generator of community Two conclusions emerge The first is that one's relationships with others will always be central in determining the social political and artistic forms that philosophical self reflection will take The second is that our practices of aesthetic judgment are bound up with our efforts as philosophers to adapt ourselves and our objects of interest to the inescapably historical and

indeterminate conditions of experience The papers collected here address the issue that critical communities and aesthetic practices are never politically neutral and can never be abstracted from their particular contexts It is for this reason that the contributors investigate the politics not of laws parties or state constitutions but of open indefinably critical communities such as audiences peers and friends Critical Communities and Aesthetic Practices is distinctive in providing a current selection of prominent positions written for this volume Together these comprise a pluralist un homogenized collection that brings into focus contemporary debates on critical and aesthetic practices Bibliografisch Repertorium Van de Wijsbegeerte ,1991 **International Books in Print** ,1990 **Répertoire bibliographique de la philosophie** ,1991

Unworldliness in Twentieth Century German Thought Stéphane Symons,2024-12-12 What happens when the world around us feels fragmented How can a person continue to respond positively to their environment when it seems to have lost its internal coherence These questions lie at the heart of this innovative interpretation of some of the most influential German philosophers of the twentieth century The key figures in this study are the young Georg Luk cs 1885 1971 Ernst J nger 1895 1998 Ernst Bloch 1885 1977 Theodor Adorno 1903 1969 Max Kommerell 1902 1944 and Siegfried Kracauer 1889 1966 By establishing an intellectual dialogue among these otherwise diverse thinkers this study identifies a common interest the question whether an unworldly fragmented universe can nonetheless elicit a creative response from individuals Together these authors offer an alternative to what is considered the dominant trend in twentieth century German philosophy the phenomenological emphasis on humans lived interactions with a shared and unified lifeworld Special attention is given to six distinct interpretations of Miguel de Cervantes s novel Don Quixote and the unworldly actions of its main character Unworldliness in Twentieth Century German Thought will appeal to researchers and advanced students interested in twentieth century continental philosophy German intellectual history critical theory and literature and philosophy **Karl Popper and the Social Sciences** William A. Gorton,2012-02-01 This is the first book length exploration of Karl Popper s often neglected contributions to the philosophy of social science William A Gorton situates Popper s ideas on social inquiry within the broader framework of his thought including his philosophy of natural science his ontological theories and his political thought Gorton places special attention on Popper s theory of situational analysis and how it aims to heighten our understanding of the social world by untangling the complex web of human interaction that produces unintended and often unwanted social phenomena Situational analysis Gorton contends involves a significant departure from the method of the natural sciences despite Popper s plea for the unity of scientific method Gorton also addresses some common misconceptions concerning Popper s stance toward economics and Marxism making the provocative claim that contemporary analytical Marxism provides the best current example of Popperian social science put into practice UNITED STATES POLITICAL SCIENCE DOCUMENTS Volume Thirteen 1987 part 2 Document Descriptions ,1988 The Dialectical Self Jamie Aroosi,2018-11-09 Although Karl Marx and S ren Kierkegaard are both major figures in nineteenth century Western thought

they are rarely considered in the same conversation Marx is the great radical economic theorist the prophet of communist revolution who famously claimed religion was the opiate of the masses Kierkegaard is the renowned defender of Christian piety a forerunner of existentialism and a critic of mass politics who challenged us to become the single individual But by drawing out important themes bequeathed them by their shared predecessor G W F Hegel Jamie Aroosi shows how they were engaged in parallel projects of making sense of the modern dialectical self as it realizes itself through a process of social economic political and religious emancipation In *The Dialectical Self* Aroosi illustrates that what is traditionally viewed as opposition is actually a complementary one sidedness born of the fact that Marx and Kierkegaard differently imagined the impediments to the self's appropriation of freedom Specifically Kierkegaard's concern with the psychological and spiritual nature of the self reflected his belief that the primary impediments to freedom reside in subjectivity such as in our willing conformity to social norms Conversely Marx's concern with the sociopolitical nature of the self reflected his belief that the primary impediments to freedom reside in the objective world such as in the exploitation of the economic system However according to Aroosi each thinker represents one half of a larger picture of freedom and selfhood because the subjective and objective impediments to freedom serve to reinforce one another By synthesizing the writing of these two diametrically opposed figures Aroosi demonstrates the importance of envisioning emancipation as a subjective psychological and spiritual process as well as an objective sociopolitical and economic one *The Dialectical Self* attests to the importance and continued relevance of Marx and Kierkegaard for the modern imagination
