Research and Practice in Social Skills Training A.S. Bellack, M. Hersen, 2013-11-11 It is perhaps trite to refer to human beings as social animals but nevertheless it is true A substantial portion of our lives is spent in interactions with other people Moreover the nature quality and quantity of those interactions have a tremendous impact on behavior mood and the adequacy of adjustment Faulty interpersonal relationship patterns have reliably been associated with a wide variety of behavioral psychological dysfunctions ranging from simple loneliness to schizophrenia Most traditional analyses of interpersonal failures have viewed them as consequences or by products of other difficulties such as anxiety depression intrapsychic conflict or thought disorder Consequently remedial efforts have rarely been directed to interpersonal behavior per se Rather it has been expected that interpersonal relationships would improve when the source disorder was eliminated While this model does account for some interpersonal dysfunctions e.g. social anxiety can inhibit interpersonal behavior it is not adequate to account for the vast majority of interpersonal difficulties In fact in many cases those difficulties either are independent of or underlie other dysfunctions e.g. repeated social failure may produce depression or social anxiety

Parents are People, Too National Institute of Mental Health (U.S.),1974 *Identity and Intimacy in Marriage* Susan Krauss Whitbourne,Joyce B. Ebmeyer,2013-11-11 Through the research on which this book reports we have been given the unique opportunity to explore the complex nature of two of the most important issues in the lives of adults identity and intimacy It is with deep gratitude that we give credit to the 80 individuals in our sample who allowed us to explore these processes in their lives Our purpose in writing this book was in some ways a modest one Both of us believed that research on the Eriksonian concept of intimacy was deficient in that it was limited to the reports of individuals about them selves We maintained that this kind of research could provide only a narrow and probably biased view of the intimacy development of individ uals By obtaining complementary responses to the intimacy interview from both partners in a marital relationship we hope to pave a new path that fu ture researchers in this area will follow Beyond this methodological advance we intended that this book s theoretical focus could put a new perspective on the well trodden path of research on marriage This more ambitious gaal is one that we faced with some trepidation The literature on marital adjustment and satisfaction is vast and potentially overwhelming **Catalog. to talk first of its roots its beginnings In the mid 1980s there emerged in some quarters the sense that it was time for family studies to take stock of itself A goal was thus set to write a book that like Janus would face both backward and forward a book that would give readers both a perspective on the past and a map for the future There were precedents for such a project The Handbook of Marriage and the Family edited by Harold Christensen and published in 1964 the two Contemporary Theories about the Family volumes edited by Wesley Burr Reuben Hill F Ivan Nye and Ira Reiss published in 1979 and the Handbook of Marriage and the Family edited by Marvin Sussman and Suzanne Steinmetz then in production
