Alluvial Fans An Attempt At An Empirical Approach:

Alluvial Fans Andrzej H. Rachocki, **Alluvial Fans** Andrzej Rachocki,1981 **Alluvial Fans in Southern Iran** Saeid Pourmorad,Ashutosh Mohanty,2022-05-24 This book presents a complete set of studies of alluvial fan sediments in southern Iran from the point of view of sedimentology sedimentary geochemistry tectonics economic geology groundwater geomorphology hazards and telemetry In addition the book focuses on advanced topics and theory which practically serves as a model for the study of this type of sediment around the world Alluvial fans are an important and fundamental factor in many sciences such as geology environmental science natural hazards groundwater science agriculture and many other related sciences Lack of accurate knowledge of their constituent sediments has always been an important problem for experts in many science disciplines From the economic point of view the identification of alluvial fan deposits is of particular importance For example alluvial deposits are the centre of groundwater accumulation and most groundwater reservoirs within the sedimentary basin are fed by water from alluvial deposits Most of the gold production in South Africa has been formed as placer deposits in ancient alluvial fans In addition a large amount of uranium placer deposits is extracted from old alluvial fans in sedimentary basins in South Africa This book serves as an ideal guide for experts in earth and environmental sciences and hydrology **Flood Hazard Identification and Mitigation in Semi- and Arid Environments** Richard H. French,Julianne J. Miller,2012 Alluvial fans are ubiquitous geomorphological features that occur throughout the world regardless of climate at the front of mountains as the result of erosion and deposition They are more prominent in semi and arid climates simply because of the lack of vegetative cover that masks their fan shapes in more humid areas From both engineering and geological viewpoints alluvial fans present particular fluvial and sedimentation hazards in semi and arid regions because episodic rainfall runoff events can result in debris mud and fluvial flows through complex and in some cases migratory channel systems Further in semi and arid climates alluvial fans often end in terminal or playa lakes Given the uniform topography of playa lakes these features often present ideal locations for facilities such as airports however regardless of the engineering advantages of the topography the episodic and often long term flooding of these lakes attracts migratory birds The purpose of this volume is to summarize the current state of the art from the viewpoint of engineering in the identification and mitigation of flood hazard on alluvial fans and to accomplish this a fundamental understanding of geology is required Hydraulic Processes on Alluvial Fans R.H. French,1987-06-01 Alluvial fans are among the most prominent landscape features in the American Southwest and throughout the semi arid and arid regions of the world The importance of developing a qualitative and quantitative understanding of the hydraulic processes which formed and which continue to modify these features derives from their rapid and significant development over the past four decades As unplanned urban sprawl has moved from valley floors onto alluvial fans the serious damage incurred from infrequent flow events has dramatically increased This book presents a concise coherent discussion of our current and rapidly expanding

knowledge of hydraulic processes on alluvial fans It addresses the subject from a multidisciplinary viewpoint acquainting the geologist with engineering principles and the civil engineer and planner with geological principles pertinent to the analysis of hydraulic processes on alluvial fans The book thus provides much of interest to geologists civil engineers and planners involved in floodplain management and drainage design in arid and semi arid regions **Geomorphology of Desert**

Environments A. D. Abrahams,A. Parsons,2013-04-17 Over the last twenty years there has been a major expansion of knowledge in the field of landforms and landforming processes of deserts This advanced level book provides a benchmark for the current state of science and is written by an international team of authors who are acknowledged experts in their fields

History of Fluvial Hydraulics R. J. Garde,1995 Fluvial Hydraulics Deals With The Hydraulics Of Rivers Flowing Through Credible Material And Transporting Some Of The Material With Them It Encompasses Mechanics Of Sediment Transportation Channel Hydraulics And Channel Formation Geometry And Changes In Alluvial Rivers Even Though The Earlier Civilizations Faced Problems Relating To Alluvial Rivers The Science Of Fluvial Hydraulics Started Taking Shape Only About 300 Years Back The Significant Contributions To This Subject Have Been Made Only During The Past Two Centuries This Book Briefly Outlines The Developments In Fluvial Hydraulics And Gives To The Men Of The Past And Present Who Have Contributed To The Development Of The Subject Their Just Due The Major Emphasis In The Book Being On Hydraulic Aspects The Peripheral Topics Such As Erosion And Drainage Patterns Are Only Briefly Mentioned It Is Hoped That This Book Will Stimulate Others To Collect Additional Information On The Subject Which Can Form The Basis For A More Exhaustive Record Of The History Of Fluvial Hydraulics *Climatic Geomorphology* M. Gutierrez Elorza,2005-12-29 During

the past few decades climatic geomorphology has been substantially enlarged in knowledge thanks to numerous detailed investigations the application of a large number of techniques and the acquisition of abundant absolute dates The challenge of predicting the effects of the prophesied future global warming on morphogenetic processes and landforms has encouraged geomorphologists to study the Late Pleistocene and Holocene climatic changes from the geomorphological and geological record The advances achieved in the field of climatic geomorphology during the past years are reflected by the publication of several specific monographs about the different morphoclimatic zones The aim of this book is to provide an up to date general view of this branch of geomorphology It includes a chapter on applied geomorphology for each morphoclimatic zone providing an approximation of the main environmental problems Geoscientists geomorphologists Alluvial Fans: A Field

Approach Andrzej H. Rachocki,Michael Church,1990-04-18 This collection of papers brings together the work of authors from ten countries who examine a wide variety of alluvial landforms in various geographical climatological and geological settings from mountainous terrain and shore environments to temperate and dry climates Ties together basic and applied studies emphasizing the importance of historical context in geomorphological and sedimentological investigations Well illustrated including foldout panoramas *Morphology of Alluvial Fans in the Coachella Valley* Eileen Janet Napoleon,1990 *Next*

Generation Environmental Models and Computational Methods George Delic, Mary Fanett Wheeler, 1997-01-01 Large scale changes are taking place in the way modelling is performed within the US EPA and a new generation of environmental models is currently under construction The US EPA is engaging in several modelling efforts in response to Congressional mandates such as the Clean Air Act and the Clean Water Act These mandates require the scientific modelling of the impact of pollutants on human health and the environment The complexity of scale in environmental models has increased by several orders of magnitude with a simultaneous demand for increased stability accuracy and efficiency in the computed model solution This book showcases numerical algorithms appropriate to the subject areas listed below and explores how new algorithmic methods would benefit the US EPA's environmental models and other environmental studies
